ABSTACT

Darmais, 2022. *Implementation of Collaborative Governance in Preventing Drug Smuggling in Nunukan Regency. Supervised by Alyas and Ihyani Malik.*

This study aimed at describing and analyzing the process of implementing collaborative governance in preventing drug smuggling in Nunukan Regency, the forms of collaboration in preventing drug smuggling in Nunukan Regency and the efforts made by the National Narcotics Agency in Nunukan Regency in preventing drugs in Nunukan Regency. This research approach used descriptive qualitative. Data collection techniques through interviews and documentation. The data analysis process was carried out with the assistance of NVivo 12 plus software. The result of this study indicated that: 1) The collaboration process was carried out in four stages. First, face to face dialogue was carried out in the form of a coordination meeting by the relevant stakeholders. Second, Trust building with the signing of the MOU and the participation of stakeholders so that collaboration went well as desired. The three commitments to process were built based on the drug problem which considered to have a negative impact on everyone. Fourth, Shared understanding was done through socialization. 2) The form of collaboration to prevent drug smuggling in Nunukan Regency was a form of network collaboration where drug prevention activities werw carried out based on their duties and functions as well as the presence of other parties involved in collaboration drug prevention efforts in Nunukan Regency. 3) The efforts to Prevent Drugs Smuggling in Nunukan Regency had been implemented quite well through Pre-emptive and Preventive efforts.
