ABSTRACT

Assessment of a company's financial level can be done by analyzing the company's financial statements. To find out whether the company's financial condition is in good condition various analyzes can be carried out, one of which is ratio analysis. The purpose of this study was to determine the financial performance of Bank BRI Syari'ah in terms of financial ratio analysis. The analytical method used is descriptive quantitative analysis using ratio measurements. Research data and information were obtained from the financial reports of Bank Syari'ah Indonesia. Keynotes: Financial Performance, Ratio, Indonesian Sharia Bank
