ABSTRACT

ASNADY PRASETYO. 2023. Impact of Covid-19 on Stock Prices and Financial Performance of Banking Companies Listed on the Indonesia Stock Exchange. Thesis. Management Study Program, Faculty of Economics and Business, Muhammadiyah University of Makassar. Supervised by: Agusdiwana Suarni and Nasrullah

This research is a quantitative study with the aim of analyzing the impact of covid on stock prices and the financial performance of banking companies listed on the Indonesian stock exchange. The sample in this study is financial data from eight companies listed on the BEI. The method of collecting data in this study is the method of documentation and literature study. The data analysis method used in this study is descriptive statistical test, analysis of data processing models and the Wilcoxon Signed Rank Test.

Based on the results of the study, it shows that based on the results of the study, the company's performance as a proxy for Net Profit Margin has a significant value of $0.159 > 0.05$, so that the financial performance of the NPM ratio does not differ significantly before and after the impact of Covid 19. Company performance as a proxy for Operating Profit Margin (OPM)) has a significant value of $0.161 > 0.05$, then the hypothesis is rejected. The results can be concluded that the financial performance of the OPM ratio did not differ significantly before and after Covid 19. The financial performance proxied by Return on Assets (ROA) has a significant value of $0.157 > 0.05$, so the hypothesis is rejected. The results can be concluded that the financial performance of the OPM ratio did not differ significantly before and after Covid19.
