The independent curriculum was launched by the Ministry of Education, Culture, Research and Technology (Kemdikbudristek) in 2022, which is a new breakthrough in the world of Indonesian education. This curriculum emphasizes developing the profile of Pancasila students and provides flexibility to schools and teachers in designing learning that suits the needs and interests of students. This research aims to find out how the Merdeka Curriculum is implemented in elementary schools, along with the supporting and inhibiting factors. This research was conducted using qualitative methods, using data collection techniques through observation, interviews and documentation. The data obtained was analyzed using thematic data analysis techniques.

The research results show that the implementation of the independent curriculum at the UPTD SD Negeri 75 Barru school is still in its early stages and faces various challenges. The main inhibiting factors are teachers' lack of understanding of the independent curriculum, as well as limited school resources and infrastructure. On the other hand, there are also several supporting factors for implementing the independent curriculum, such as the enthusiasm of teachers and school principals to implement changes, support from local governments, and training through the PMM training application.

Based on the research results, it was concluded that the implementation of the independent curriculum at the UPTD SD Negeri 75 Barru school requires strong support from various parties, both internal and external to the school. Efforts need to be made to increase teachers' and school principals' understanding of the independent curriculum, as well as providing adequate resources and infrastructure. Apart from that, there needs to be ongoing assistance from the regional government and the Ministry of Education and Culture to ensure the smooth implementation of the independent curriculum in elementary schools.
