ABSTRACT

Zul Fahmi, 2024. Human Capital Investment through Usaha Merdeka (Self-funded Enterprise) at Universitas Muhammadiyah Makassar. Supervised by H. Jam'an and Agussalim Harrang.

Self-funded enterprise is part of the Independent Campus program. This research study used qualitative methods. This research was to determine the process of implementing Human Capital Investment through Self-funded enterprise at Universitas Muhammadiyah Makassar. This research involved the chief executive, technical implementer and Merdeka entrepreneurial participants as stakeholders in implementing the program by assessing several indicators, namely: Knowledge, Expertise, Ability and Skills. The data collection techniques used were observation, interviews, documentation methods. The data analysis techniques used in this research were data collection, data reduction, data presentation, verification and confirmation of conclusions. This research concludes that the Self-funded enterprise program is the latest breakthrough program from the Ministry of Education and Culture and Technology Research to help students experience the world of work throughout Indonesia with a fairly easy registration and selection process. The implementation of the Independent Entrepreneurship Program (WMK) involves several parties, including: students, universities (HE) as host implementing the program, and the students' home universities. This aims to provide practical experience for students in entrepreneurial activities through the process of providing entrepreneurial mindset and competence, developing and creating business concepts, entrepreneurial practices and development. Following up on the findings in this research, the implementation of the Independent Business program at Universitas Muhammadiyah Makassar should continue to be optimized.
