Penelitian ini membahas (1) Maharah qira’ah dan kemampuan membaca Alquran siswa Lab School SMP Unismuh Makassar. (2) Korelasi maharah qira’ah terhadap kemampuan membaca Alquran siswa Lab School SMP Unismuh Makassar.

Penelitian ini menggunakan jenis penelitian korelasi dengan pendekatan metode kuantitatif. Metode pengumpulan data pada penelitian ini yaitu observasi, metode tes, dan dokumentasi.

Hasil penelitian menunjukkan bahwa (1) Kemampuan maharah qira’ah siswa Lab school SMP Unismuh Makassar berdasarkan hasil penelitian baik. Hal ini dibuktikan dengan diketahui rata-ratanya adalah 75,64. Dan kemampuan membaca Alquran siswa Lab school SMP Unismuh Makassar baik dengan rata-rata 75,79. (2) Berdasarkan pada uji hipotesis diperoleh hasil t hitung adalah 11,676. Sedangkan t tabel untuk taraf signifikansi 5% yaitu 2,026, ini berarti nilai t yang diperoleh dalam perhitungan yaitu $t = 11,676 > t_{0,025:(37)} = 2,026$ sehingga hipotesis nol ditolak pada tingkat signifikansi 5%. Artinya bahwa terdapat korelasi yang signifikansi antara maharah qira’ah dengan kemampuan membaca Alquran siswa Lab school SMP Unismuh Makassar.

Kata Kunci: Korelasi, *Maharah qira’ah*.

ABSTRACT

Nurul Istiqamah Abu, 105241100820, 2024 "*Correlation Study of Maharah Qira'ah on the Al-Quran Reading Ability of Unismuh Makassar Middle School Lab School Students*". Supervisor I Nasruni and Supervisor II Abdillah S.

This research discusses (1)Maharah qira'ah and reading ability to read koran of Lab School students at Unismuh Middle School Makassar. (2) Correlation of maharah qira'ah on the ability to read the Koran of Lab School students at Unismuh Middle School, Makassar.

This research uses a type of correlation research with a quantitative method approach. Data collection methods in this research are observation, test methods, and documentation.

The research results show that (1)The ability of maharah qira'ah of Lab school students at Unismuh Makassar Middle School based on research results is good. This is proven by knowing that the average is 75.64. And the ability to read the Koran of Lab school students at Unismuh Makassar Middle School is good with an average of 75.79. (2) Based on the hypothesis test, the calculated t result is 11,676. Meanwhile, the t table is for a significance level of 5%, namely 2.026, this means that the t value obtained in the calculation is $t = 11.676 = 2.026$ so that the null hypothesis is rejected at the 5% significance level. This means that there is a significant correlation between maharah qira'ah and the ability to read the Koran of Lab school students at Unismuh Middle School, Makassar.
