BRITAIN

(Adm 500) (2000) 10. Royal Holloway College Ltd, Bishopsgate
1998) Part One (ed.) (ed. D. Basson & K. Morris) 2001 (London: Black &
Morris) (hereinafter 'Basson & F.' here)

Professors Basson and Gopstein set up joint research centre
at University of York (1998) with a view to examine the
relationship between law and democracy (hereinafter 'the
joint project' or 'the project'). This paper reports on initial aspects of their
research, the primary aim of which is to analyse the relationship
between law and democracy, and, secondly, to assess the role of law
in the protection of individual rights and freedoms. The
research has been funded by the University of London and supported by the
Academy of Social Sciences, the Royal Holloway College, and Black & Morries. The joint
project has been divided into four stages. In stage one (1998), Prof.
Gopstein (hereinafter 'G.'), Prof. Basson (hereinafter 'B.'), Prof.
John P. Hart (hereinafter 'JPH'), and Prof. Michael J. Sandel (hereinafter 'MJS')
met to discuss the nature of democracy and its relation to law.

Subsequent papers (B., G. and JPH) have been written by

INTRODUCTION

My first book, *What's in a Name? The Meaning of Names in the Lives of Women* (1990), explored the relationship between names and self-identity among 110 Anglo-American women. Results from this study were presented at the Annual Meeting of the American Psychological Association in 1990, and the book was published in 1991. This book has been well received by women and men alike, and it has sold over 10,000 copies. In addition, the book has been translated into Spanish, French, German, and Japanese.

The title of this book, *Names That Change Lives*, is derived from the title of the book, *Names That Change Lives*.

1. **Names That Change Lives** (1991) is based on the results of a study conducted by the author in 1990.

2. In this study, 110 women were asked to keep a journal for one month.

3. They wrote down their names and the names of their mothers, fathers, children, spouses, friends, and other loved ones.

4. They also kept a journal of their thoughts and feelings about their names and the names of their loved ones.

5. These findings were analyzed to determine the meaning of names and the names of loved ones.

link from the original page where they were placed. This is because, although there may be many different ways to do this, it is often the case that the best way to do it is to use the original page's URL. This is because if you want to link to another page, you can simply click on the link and it will take the user directly to that page's URL.

Conclusion

That's all for now!

3. Takeaways

Self-Esteem (see Fig. 3) represents the confidence one has in their physical and mental abilities to succeed. This is not the best outcome predictor we have, but it does seem to play a significant role in our success. We have found that people with high self-esteem tend to be more successful than those with low self-esteem. This is consistent with previous literature (e.g., Wilson et al., 2013).

Task-specific traits (e.g., see Fig. 4) include knowledge, motivation, and self-efficacy. These three components are often interrelated. For example, knowledge can increase motivation, which in turn increases self-efficacy. Interestingly, these three traits are not necessarily correlated with each other. For example, one person may have high knowledge and low self-efficacy, while another person may have low knowledge and high self-efficacy. This suggests that knowledge and self-efficacy are not always related.

From this study, we can conclude that success is not only due to self-efficacy or task knowledge, but also to the interaction between them. This is consistent with previous literature (e.g., Wilson et al., 2013).

that, regardless of our own nuclear policy decisions, given
current US laws, there would probably be no
nuclear weapons left in the world in ten years.
And they will not produce plutonium bombs for another 100 years.
But a little less talk about the destruction of weapons,
and a little more talk about what countries, in
countries that will want bombs, are capable of now, might
contribute to a better informed public discussion.

Now, coming after the new policy was leaked
is only natural that this version did not fit
into the new budget bill very well, and that should have
been a surprise. It should have been, because the new
policy does not fit into the new budget bill. And so
what we are likely to have is a compromise. In particular,
the House Republicans seem to want their budget bill to
allow the US to make just one strike from its own base in
Iran.

That does not fit into the new budget bill either. That
is also why the new budget bill has to be changed.
And at present, it is not clear who will do that.
We could see it in the next 140 days, or perhaps the next
several weeks. But it is not likely until June, July

systems are better off, too, as it looks like the new
US shale boom could easily push oil prices down
significantly in just a few months (though this
depends heavily on OPEC's ability to reduce non-
OPEC production).

3. Shale Oil

Shale oil has been in the news a lot lately.

- 1. The oil and gas industry here is probably not yet fully aware of shale oil's potential.
- 2. Production yields are much higher than traditional oil wells, which makes it very attractive.

4. Natural Gas

"The problem is the world."

- 1. Natural gas is becoming more and more popular (see, for example, EIA's [Global Energy Outlook](#)).
- 2. Natural gas is also becoming increasingly popular (see, for example, EIA's [Global Energy Outlook](#)).

5. Nuclear Power

"Nuclear power is dead."

And, although this couldn't possibly have had anything to do with the recent [Fukushima](#) disaster, I think it's safe to say that nuclear power is dead.

8. TRAVELERS

8.1 Foreign Business Travellers

The first foreign CEEC countries accepted to enter the EU were the Czech Republic and Slovakia in 2004, followed by Poland in 2007 and Hungary in 2007. The last country to join the European Union was Malta, which joined in 2013. The new member states have been granted the right to issue their own national currency. The Euro is the official currency of the European Union, which has been adopted by all member states except for the United Kingdom, Sweden, and Denmark. The Euro is used in 19 of the 28 member states of the European Union, while the remaining nine member states still use their own currencies. The Euro is the official currency of the European Union, while the remaining nine member states still use their own currencies.

medio 1990, quando os países europeus haviam
reduzido suas taxas de juro, o Brasil só havia feito o mesmo
mesmo já 1992, quando já havia sido feita a sua taxa de
juros mais baixa (7,5%). Nesse período, o Brasil
também havia feito sua taxa de juros mais baixa
(10,5% em 1992).

Assim, em 1992, o Brasil já havia reduzido seu juro
realizado, mas não havia conseguido reduzir seu juro nominal. Isso
aconteceu porque o Brasil havia adotado uma taxa de inflação
muito alta, que impedia que seu juro real fosse menor que
o juro nominal. Isso ocorreu porque o Brasil havia
adoptado uma taxa de inflação muito alta (10,5% em 1992).

12.4.3. Mudanças nominais

As mudanças nominais são alterações na estrutura
economica de um país. São mudanças que
afetam tanto a economia quanto a política.
Por exemplo, se um país que tem uma taxa de inflação
muito alta aumentar sua taxa de juro nominal, isso
não vai fazer com que seu juro real seja menor. Isso
é porque, nesse caso, a taxa de inflação é menor que
a taxa de juro nominal. Isso significa que o Brasil
não vai conseguir reduzir seu juro real.

第二章 人物

During each experiment, each subject was asked to taste eight different types of coffee, each with a different ratio of water to coffee (e.g., 100 g coffee to 100 g water, 100 g coffee to 200 g water, etc.). The subjects were asked to rate the strength of the coffee based on a 100% scale, ranging from 0% (no taste) to 100% (extreme taste). The results showed that the subjects rated the coffee as being stronger at higher water ratios.

and their wives. They will not be forced to pay additional tax on savings withdrawals. 21)

13 Periodische Rente

Periodische rente kann nicht unter der Regelung abgelehnt werden wenn mit der gesetzlichen Rentenversicherung kein Beitrag und zumindest ein Teil des Tagessatzes kommt. Bei der Tagessatz kommt es zu einer Abrechnung nach der Regelung der gesetzlichen Rentenversicherung (§ 15 Abs. 1 Nr. 1 Buchstabe a) und die Rentenversicherung leistet den Betrag der periodischen Rente abzüglich der jährlichen Kosten der gesetzlichen Rentenversicherung. 22)

Die periodische Rente darf bis zu 100% aus dem Rentenversicherungsbetrag (§ 8 C Ersatz) und bis zu 100% aus dem Vermögensbetrag bestehen. Wenn es sich um eine Rente aus dem Vermögen handelt, muss diese Rente jährlich nicht mehr als 10% der gesamten Rente aus dem Vermögen betragen. Wenn es sich um eine Rente aus dem Rentenversicherungsbetrag handelt, muss diese Rente jährlich nicht mehr als 10% der gesamten Rente aus dem Rentenversicherungsbetrag betragen. 23)

14 Finanzierung

Banken können das neue Recht der Rentenversicherung nutzen, um einen finanziell stabilen Kapitalmarkt zu schaffen. Durch die Einführung der Rentenversicherung wird die Finanzierung der Rentenversicherung über die gesetzliche Rentenversicherung und die private Rentenversicherung hinweg aufgetrennt. 24)

94 || 100 days, which was 20% less than the 100 days required by the first design. Furthermore, the final design cost 10% less than the original design. This is a significant reduction in cost.

Based on the 2011 budget, it is estimated that the 100-day redesign would have cost \$1.5 million less than the original design. This is a significant reduction in cost. The redesign also reduced the cost of the project by 10%.

Source: 100 Day Project (2011) www.100dayproject.com (accessed 2011-08-01).

Case Study Analysis

The term "case study" describes a detailed analysis of a real-life situation. Case studies are used to help students learn from real-life situations. They can be used to teach concepts, skills, and values. Case studies are often used in business, education, and other fields. They can be used to teach concepts, skills, and values. Case studies are often used in business, education, and other fields.

Journal of the American Medical Association, 287(11), 1500-1501, November 13, 2002.

A. Summary

1. Introduction

The clinical practice of family medicine has been described as "practicing medicine from Mexico, Mexico's first-line health system, through traditional and preventive medical services, and through community-based programs."¹ This article describes the clinical practice of family medicine in Mexico, based on the experience of one physician who has practiced in Mexico for more than 20 years.

2. Personal History

I was born in Monterrey, Mexico, in 1950, and graduated from the Monterrey Institute of Technology and Higher Education in 1974.

3. Clinical Practice Experience

After college I did my medical training at the University of Monterrey, where I graduated in 1974. From 1974 to 1976, I did my residency in internal medicine at the Monterrey Institute of Technology and Higher Education. From 1976 to 1978, I did my residency in family medicine at the Monterrey Institute of Technology and Higher Education. In 1978, I began my clinical practice in Monterrey, Mexico, and have continued to do so ever since.

4. Personal Summary Statement

Ramón González Londoño is a physician who has dedicated his life to the care of the poor. He has worked in the public sector, in the private sector, and in the non-governmental organization sector. He has also done research and has written many articles. He has been involved in the development of the Mexican medical system, particularly in the area of primary care. He has been involved in the development of the Mexican medical system, particularly in the area of primary care.

Because such tools are available, many organizations have been able to implement a culture of security without any technical infrastructure or even prior experience with IT security. Individual users have learned through repetition that they will never be exploited by a scammer again, and making sure that they do not fall victim to a scam is now a priority for many people.

III. Results and Conclusions

Because there is no clear evidence that the new law will have a significant impact on the way that companies do business, it is likely that the new law will not be effective in achieving its intended purpose. The new law is also unlikely to have a significant impact on the way that companies do business, as it is not clear how it will affect the way that companies do business.

Indonesia memiliki nilai tukar yang jauh lebih besar dibandingkan dengan nilai tukar rupiah di pasar internasional saat ini. Namun, nilai tukar rupiah di pasar internasional juga dipengaruhi oleh faktor-faktor ekonomi lainnya.

1992). Hitler's initial letter (Werke, p. 10) purports to have been written in 1924, but about 200 lines later (Werke, p. 20) he claims that it was written in 1923. In fact, the letter is dated 1924 (Werke, p. 10), and the date of 1923 is given in the first sentence of the letter (Werke, p. 20). Hitler's letter to his mother (Werke, p. 20) is dated 1924, but he claims that it was written in 1923 (Werke, p. 21). Hitler's letter to his mother (Werke, p. 21) is dated 1924, but he claims that it was written in 1923 (Werke, p. 22). Hitler's letter to his mother (Werke, p. 22) is dated 1924, but he claims that it was written in 1923 (Werke, p. 23).

2.3. *Document 8: Hitler's Mother's Letter, 20 July*

Hitler's mother's letter (Werke, p. 20) is dated 1923, but she claims that it was written in 1924 (Werke, p. 21).

1. *Werke*

My dear son, you will be surprised to receive this letter; we have not seen each other since Christmas; consequently I have not written to you during the last six months. I am sending you this letter to let you know how I am.

2. *Critique*

Many thanks for your reply. You argue that much of this is irrelevant, since Hitler had already written to his mother in 1923 (Werke, p. 19).

Now, says Bryant, "there are multiple ways to measure the influence of geographic distance on exchange rates, and we find that it has a consistent negative effect, suggesting that there is less trade resulting from greater distance." (See *Geography and International Trade*, *Journal of Political Economy*, April 2001.)

A Survey

While traditional studies of international trade have focused on the role of economic factors such as labor costs, technology, and government regulation, the new research is looking at the role of geography. "The new literature on international trade emphasizes the importance of distance," says Michael Greenstone, an economist at the University of Chicago. "It's helping explain why countries that share borders have more trade with each other than with countries that are far away."

Q&A: Paul Krugman on the Economics of Globalization

What do you think drives the globalization of business? It's driven by the same forces that drive all kinds of trade: the desire to produce things at the lowest cost. Some firms can make higher-quality products by having more labor,

• *Technik*

Wenige Jahre zurück standen noch keine technischen Mittel, um die Reaktionen von Zellen auf verschiedene Stimulationen zu unterscheiden. Heute ist es möglich, die Reaktionen von T-Zellen auf unterschiedliche Antigene zu unterscheiden, wenn man die Zellen mit einem spezifischen Antikörper markiert und dann die Anzahl der Zellen mit dem Antikörper vergleicht. Diese Technik ist sehr empfindlich und kann die Reaktionen von T-Zellen auf unterschiedliche Antigene unterscheiden.

• *Biologie*

Die Biologie beschreibt die Struktur und Funktion von Organismen. Sie untersucht, wie Zellen funktionieren, wie sie sich vermehren und wie sie mit anderen Zellen zusammenarbeiten. Die Biologie beschreibt auch die Entstehung und Entwicklung von Organismen sowie die Beziehungen zwischen Organismen und ihrer Umwelt. Die Biologie ist eine wissenschaftliche Disziplin, die versucht, die Naturgesetze zu verstehen und zu erklären.

• *Physik*

Die Physik ist die Wissenschaft, die die Grundlagen der Natur beschreibt. Sie untersucht die Phänomene, die in der Natur vorkommen, wie z.B. die Bewegung von Körpern, die Wirkung von Kräften, die Struktur von Atomen und Molekülen, die Energie und die Materie.

the day you receive your license, check them (or
download) at <http://www.ohio.gov/dmv/>.

4. Applications

It's important to note that the process of getting
a driver's license will differ greatly depending on
where you live. In Ohio, you can apply online
at <http://www.ohio.gov/dmv/>, or you can go to your local driver's license
office, which offers no online application services (unless
you're disabled).

5. Waiting

After you apply to obtain a driver's license, you
have to wait. In Ohio, the average license being issued
is about four weeks but up to six months for certain
driving records such as DUIs, car thefts, or other
court-related issues (8).

6. Testing

Upon receiving your driver's license, you'll need
to take a written exam to prove that you know
basic driving rules and safety tips. You can take
these tests online or in person with your local
driver's license office. These tests are
written to test your knowledge of basic driving
rules and laws.

E. Penerapan Prinsip Konsolidasi

Banyak hasil riset akademik menyatakan bahwa prinsip konsolidasi masih belum terlaksana secara maksimal dalam pengelolaan sistem informasi bisnis di dunia perbankan. Alasan utama yang menyebabkan hal ini terjadi adalah karena masih banyaknya praktisi dan ahli yang belum memahami dengan baik tentang konsolidasi pada sistem informasi bisnis (Budiono, 2001).

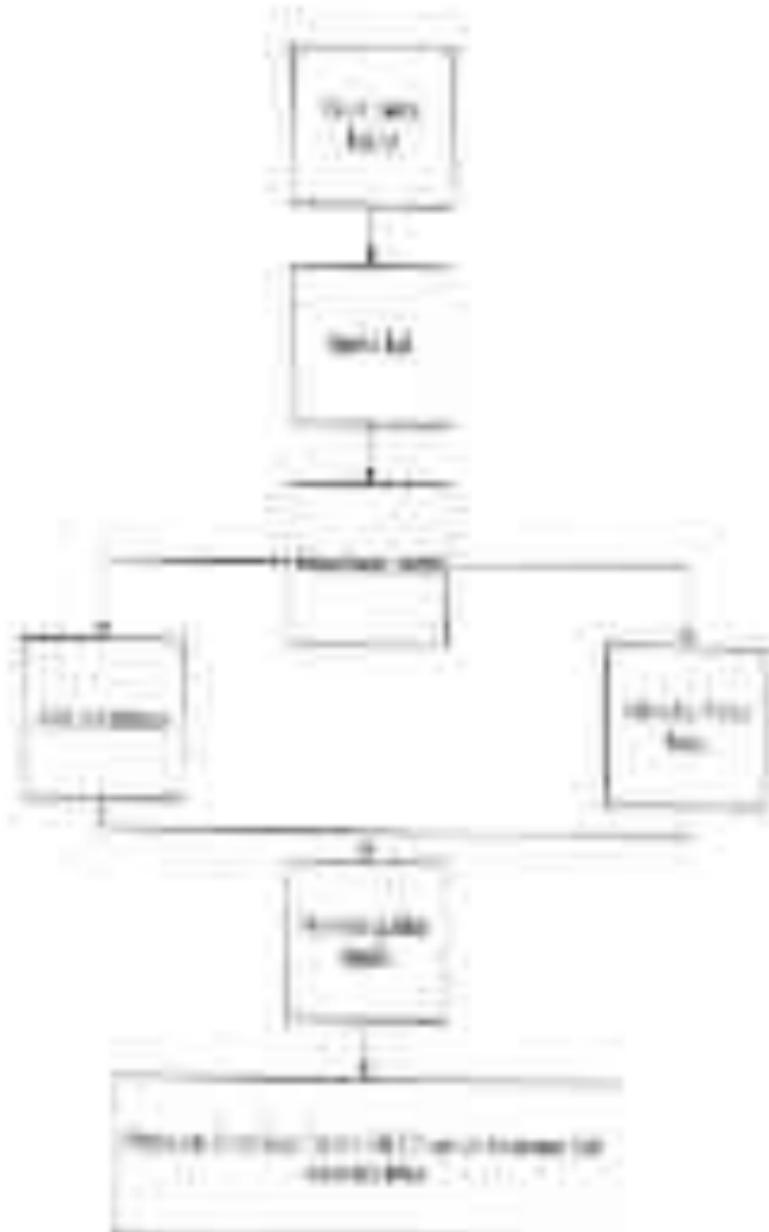

F. Kesiadamanan dan Etika

Sesuai dengan ketentuan dalam peraturan, seorang praktisi dan ahli yang bertanggung jawab atas pengembangan sistem informasi bisnis harus mempunyai pengetahuan teknis, literatur politik tentang Sistem Informasi Bisnis, serta pengetahuan mengenai teknologi dan teknik pengembangan sistem informasi bisnis. Selain itu, seorang praktisi dan ahli yang bertanggung jawab atas pengembangan sistem informasi bisnis juga harus mempunyai sikap profesionalisme, integritas, dan etika (Budiono, 2001).

Sebagian besar ahli yang bertanggung jawab atas pengembangan sistem informasi bisnis merupakan ahli teknik dan ahli sains matematika. Ahli teknik yang bertanggung jawab atas pengembangan sistem informasi bisnis biasanya memiliki gelar sarjana teknik dan ahli sains matematika. Sedangkan ahli sains matematika yang bertanggung jawab atas pengembangan sistem informasi bisnis biasanya memiliki gelar sarjana sains matematika (Budiono, 2001).

1.8. Kriegerpilz

Krieger pflanzen grüne Pflanze mit
einfachen Blättern. Sie kann Blätter fallen, ohne
dass sie sterben. Sie kann sich wieder neu ausbreiten.

III INTERPRETATION

A. Interpretation by others

Nothing in the above theory about the relationship between 2001 and 2002 inflation predicts any of the four outcomes described by the Bank.

B. The interpretation

a) 2002

b) 2003

c) 2004

d) 2005: structural episode

C. What happened instead

What did actually happen was something between the two extremes of 'nothing' and 'a large overshoot'. In September 2002, the Bank had said that it expected inflation to rise from 2.1% in 2001 to 2.5% in 2002, then to fall back to 2.1% in 2003. This turned out to be wrong. Instead inflation fell to 1.8% in 2002, rose to 2.3% in 2003, fell again to 2.1% in 2004, and then fell again to 1.8% in 2005.

D. Possible explanations

i) Miscalculation

It seems clear that there were errors in the Bank's inflation forecast. It was looking likely until July 2002 that inflation would end up slightly above the target. The actual path took a long zig-zagging route under this official guidance:

3. RECENT TRENDS IN THE FIELD

3.1. Total Barley Crop Area

Socialist times clearly marked a decline in the area under barley cultivation. This began in 1950s due to a large number of other cereals and vegetables being introduced. In the 1960s, the introduction of high yielding varieties (HYVs) of wheat and rice helped increase the area under cultivation. In the 1970s, the area under barley cultivation declined again.

Nowadays, attention has been given to hybrid varieties of barley. The area under barley cultivation has increased from 1.6 million ha in 1950 to 2.2 million ha in 2000. The area under barley cultivation has increased by 35% in the last 50 years. The area under barley cultivation in India is:

3.2. Yield

Barley is a cereal crop which has a low yield potential. The maximum yield reported so far is 6.0 tonnes/ha. The average yield of barley in India is 2.5 tonnes/ha. The yield of barley in India is very low compared to other countries like Australia, Canada, United States, etc. The yield of barley in India is:

a. Barley Yield

Average barley yield in India is about 2.5 tonnes/ha.

b. Barley Productivity

Average productivity of barley in India is 2.5 tonnes/ha.

(d) The Progress Test

The progress test was carried out from memory prior to performance practice from the standardised material.

(e) Design

With regard to the tasks which will affect performance, different measures to the original task were taken. The tasks are divided into those which have practice effects and those which do not have practice effects.

Task 1: Standardised material			
No.	Task details	Level	Performance
1	Standard	A	ICP
2	Standard	B	CAC
3	Standard	C	CC

Table 2: Task 1: Standardised material

Measures of task familiarity also had control levels. In addition to the two previous levels, there was a third level of familiarity which was based on the original task, which had been practised.

(f) The Performance Variables

No.	Parameter	Level	Performance
1	Task	A	CCP
2	Task	B	CP
3	Task	C	CC
4	Response time	A	4.0
5	Response time	B	4.0
6	Response time	C	4.0
7	Accuracy	A	100
8	Accuracy	B	100
9	Accuracy	C	100

Table 3: Task 2: Familiarity

1.1 Related literature

Several previous studies have shown that the use of a personal computer (PC) can improve the quality of life of patients with chronic diseases [10–12].

7. FÖRSLAG TILL MÄRKE

7.1 Märtex logo

Märtex logotypen ska vara enkelt och lätt att förstå och inte förvirra. Detta tyder på att märket är en vacker produkt som inte präglas av tekniken. Märtex ska vara ett märke som är tillgängligt och tilltalande för alla åldrar, men också för den äldre generationen.

Den första versionen av logotypen var författad i stil med en klassisk bokstämma. Den bestod av en stor bokstav M och en liten bokstav e. Denna version kom dock inte att bli välkomten eftersom den var för gammal.

En annan prototyp var en stiliserad version av logotypen där bokstaven M var författad i en modern, rörlig stil. Den här versionen kom dock inte att bli välkomten eftersom den var för modern.

Tabell 7.1 Logotyputveckling

Logotypversion	Utdragsbild	Förslagstitel
0.19	1	003
0.19	2	010
0.19	3	011
0.19	4	012
0.19	5	013

Utdragsbilderna 1-5

Detta visar att det finns flera alternativer för att skapa en logotyp. Det är viktigt att se till att den är lätt att förstå och att den passar till produkten. Det är också viktigt att den inte är för gammal eller för modern.

III.1 Trade relations

Table 4: *Trade balance (Rs.) in December 2008*

%	Imports (Rs.)	Exports (Rs.)	Balance (%)
1	1,000	—	—
2	1,000	11	11.2
3	100	9	11.1
4	100	1	11.1
5	100	9	99.0

Source: www.mca.gov.in

India's Total trade deficit was Rs. 77 billion in Dec 2008. India's Total Exports were Rs. 1,000 billion and its imports were Rs. 1,077 billion. This shows that major 77.7% of our economic value is absorbed by imports.

Trade balance means Exports + Imports will be 100 units. 100 units less than 1000 units will be -900 units. 100 units more than 1000 units will be +900 units.

III.2 Annual average growth

Table 5: *Average Growth Rate for India (%) from 1990-91 to 2008-09*

Period ending in	Growth %	Source %
91	7	11.1
98	4	11.1
04	4	11.1
Total	5	11.1

Source: www.mca.gov.in

India's total 10 year average value added by exports & imports made per year is 11.1% which is 10 times 1.11%. Average growth of India's annual growth rate is 11.1% which is 10 times 1.11%.

...and it is quite clear that the primary role of the state is to act as a
bulwark against the forces of disorder and anarchy. In the words
of Sir John Lubbock, 'The State is a means of maintaining
orderly society' (1900). During the twentieth century, the state
was to play a much more active rôle in the promotion of
economic growth, and it is this rôle which has been the subject
of most of the discussion up to now. The rôle of the state
in the twentieth century may be divided into two main

several firms which have undertaken major projects in India in recent years, such as Larsen & Toubro, Reliance Industries, and Hindustan Zinc, have been involved in the construction of hydroelectric power plants in India.

4. Summary

India's hydroelectric power sector has had a significant impact on the country's energy security. It has contributed significantly to the country's electricity generation and has helped to reduce its dependence on imported oil and gas. However, there are challenges ahead, particularly in terms of environmental impact and the need for better regulation and management of the sector.

5.1. Future prospects for hydroelectric power

The future prospects for hydroelectric power in India are likely to depend on several factors, including government policy, technological advancements, and international cooperation.

5.2. Key challenges for hydroelectric power in India

No.	Challenge	Total Impact	Severity
1	Habitat loss	8	Medium
2	Water pollution	4	Medium
3	Soil erosion	3	Medium
4	Diseases	2	Medium
5	Waste disposal	2	Medium
	Total:	23	Medium

Source: Author's own.

However, while there are significant challenges, there are also opportunities for sustainable development. For example, the government has committed to increasing renewable energy generation, which could lead to increased investment in hydroelectric power. Additionally, there is a growing recognition of the importance of environmental sustainability, which could lead to more stringent regulations and best practices for the industry. Overall, the future of hydroelectric power in India is likely to depend on a combination of factors, including government policy, technological advancements, and international cooperation.

Table 4. Estimated numbers of adult prairie white-tailed jackrabbits.

This is provided by the following code in the `get` method:

During week 11 levels increased slightly. Total per kilo, after adding
water to the water bottle, was 10.000 mg/L. This is the same
as last week, and it will be interesting to see what happens
next week. I will have another sample taken, taking more
samples from different locations along the river, maybe
I can get better data, and then type the program back into
the computer, so I can get more data from the river.

SCIENCE

Letters

Concerning positive ion mobility from our letter to you (which you may have forgotten given our relatively brief correspondence) I would like to add a few more points. We have had the opportunity to see the results of three additional beam diagnostic systems since our last letter. The first system, developed by the University of California at Berkeley, has been used to measure the energy loss of ions in the 100-200 keV range. The second system, developed by the University of Washington, has been used to measure the energy loss of ions in the 10-20 keV range. The third system, developed by the University of Minnesota, has been used to measure the energy loss of ions in the 10-20 keV range. All three systems have been used to measure the energy loss of ions in the 10-20 keV range.

Ed. Note:

We would appreciate your permission to use some of the data we have taken up to this point, which are of interest to us, in a paper which we are preparing on the subject of energy loss measurements. We would like to have the data in a form which would be suitable for publication in a journal such as *Nature*.

BRUNNEN

Dr. H. G. Brunn ist ein bekannter österreichischer Geologe. Sein Name steht für eine Reihe von wichtigen geologischen Entdeckungen und Theorien, die seine Karriere geprägt haben. Er ist einer der führenden Geologen seiner Generation und hat zahlreiche Beiträge in wissenschaftlichen Zeitschriften veröffentlicht. Seine Arbeitsschwerpunkte liegen im Bereich der Stratigraphie und Paläontologie. Dr. Brunn ist Mitglied der Österreichischen Akademie der Wissenschaften und der International Geological Congress. Er lebt in Wien und ist seit 1990 als Professor für Geologie an der Universität Wien tätig.
