SPEECH

**President Susilo Bambang Yudhoyono
IN THE EVENT watched the movie 'Laskar Pelangi'
TOGETHER WITH STREET CHILDREN,
JOURNALIST, AND THE CABINET MINISTER IN
INDONESIA united megaplex BLITZ GRAND
INDONESIA 8 OCTOBER 2008**

Assalamualaiku wr.wb. ...

Peace to us all. Ladies and gentlemen especially the supporting actress author, director, producer and all that has been presenting works of art is beautiful and amazing. The educators of children whom I love and I am proud of. Journalist friends and all that thank God this night together in this place.

We are scared as the people of God's servants to always praise thanksgiving because we are given an opportunity to strength and health, God willing to continuing our worship, our work, swerta duty and devotion to the nation and our beloved country. I also give appreciation to the Governor and the Pacific Islands children who came this evening together we are in Jakarta.

Before I deliver one of two things that deserve our attention as a nation who want to advance to meet a better future. Just now I was told by Andi Mallarangeng, journalist friends there who asked "whether in the evening we are here to watch the movie Laskar Pelangi". I know that the world is currently experiencing flu is a financial crisis that originated from the United States entered the other world regions and their implications are also felt in this beloved country. I told Andy thank you for what it delivered. But please we delivered at this place is not for celebration but we're in this place, first of course want to give high appreciation of the birth of beautiful artwork and also our support. I am also pleased that our children who had been mentioned to them we should be more

affectionate. Assistance for their future as well as beautiful as the other kids. Of course also want this night to stay in touch while watching the film that evokes the spirit, which reflects the character of the nation's children who want to advance into the nation's sons and daughters of God willing to have a good future. Frankly I have not read, written by director Andrea Hirata, I also have not seen this movie but I heard from many quarters that the artwork is beautiful. Karaya is inappropriate given the appreciation of art. Let us witness together the messages displayed through this film. Back to what is conveyed by some journalists were concerned that the financial crisis is two-three days is hitting the global financial system. I say that the system continues to work, since the first day of Eid we continue to work. This event is finished at 10.00 pm the night we will also discuss the return with a number of ministers, leaders of state enterprises, Bank Indonesia and others to continue the management measures.

Last night I met with the business world to compatible our steps, Before I met with Bank Indonesia ranks with those from the Ministry of Finance which is the node-node to manage these problems we face. And I'm sure most of the audience listening to that one that I provide on the directive I face a financial crisis that is sweeping the world is not coming from Indonesia, originating from the United States and other countries hit is let's just continue to develop products in the country. Let us just continue to develop the creative economy, if it continues to grow then our reliance on goods originating from outside the more shrinkage. If we further decrease the dependency will be nice imports and our exports. If that's good then it is not depressed in terms of balance of payments which are usually faced by the nations that face a crisis. So our being to encourage the development of creative economy include film is part of our great solution, not only when facing a crisis but also for economic development in our country over the medium and long term.

Ladies and Gentlemen,

Film one form of creative economy, do not be underestimated that the creative economy continues to grow well in our country. In 2007 contributed 7% of our entire economy, between 2002 and 2007 was 105 trillion, which donated the creative economy. In 2006 alone, two years ago the creative economy contributed Rp 81.5 trillion, outstanding and this will enhance the ability of our balance of payments is feared by many countries especially face this crisis.

Also accommodate the creative economy to create jobs, there are 5.4 million workers are absorbed by the creative economy began the year 2002-2006. In 2006 alone there are 2.2 million our brothers who had been unemployed working in this creative economy. While the film itself, with me there the Minister of Culture and Tourism, Minister Education, development, also we should be grateful. First frankly let alone between 1992 and 2004 we experienced a crisis of our national film production stagnated, some say a dead faint, we agreed to get up with the artists, humanists, artists film and thank God that we had at that difficult period each year produced only two up to five films. In 2007, it was last year, last year has produced 53 films. Year 2008 to August produced 67 films, which Insya Allh at the end of this year could reach 80 films. Let's look at the year 2006 6 movie titles, headings 2001 4, 2002 9 titles, 13 titles in 2003, 2004, 22 titles, headings 2005 21, 2006 45 titles, 53 titles in 2007, and I say God willing, we could reach more than 70 titles. Encouraging and we should be grateful, films Indonesia has hosted in his own country. The last holiday, Eid holiday than 500 movie screens is 92% of domestic production, applause. I watch the Naga Bonar volume II, I watch Ayat-Ayat Cinta and tonight we will watch Laskar Pelangi.

Laskar Pelangi I catch is let's see the same, showed character and spirit of Indonesian children who are struggling persistent, never give in to pick up his future. I thank you and appreciation to you Andrea Hirata who have inspired and lifted the spirit and ideals of this goal. There is never a way that kids software to achieve a noble goal. Perhaps we can see the twists and turns of life, a struggle that we must look up, we imitate all especially children, with the help of all of us, good foundations, parents, educators, so they have a good way to pick up his

future. And the last priority of the present Government to improve education, very seriously. Let us collectively a success, let's take our education a success, let's film a success resurrection Indonesia and let us give sincere appreciation to all who have allowed this film comes in the middle of the book we are mainly writers, directors, producers, and all we ought to give the award. Similarly, let's see together hopefully our future better.

Wassalamualaikum Warrahmatullahi wabarakatuh
