ABSTRACT

Nur Hayany Rahman, 2025. *The Influence of Product Quality, Brand Image, and Lifestyle on the Purchase Decision of iPhone among 2021 Batch Students of FEB UNISMUH Makassar.* Supervised by Moh. Aris Pasigai and Nasrullah.

This study aims to determine the influence of product quality, brand image, and lifestyle on the purchase decision of iPhones among 2021 batch students of the Faculty of Economics and Business (FEB) at Universitas Muhammadiyah Makassar. This research employs a quantitative method, with a sample of 96 respondents selected using the Lemeshow formula. Data were collected through questionnaires and documentation studies, with data sources consisting of both primary and secondary data. The data analysis methods applied in this study include validity tests, reliability tests, classical assumption tests, multiple linear regression, and hypothesis testing. The questionnaire results were processed using the SPSS statistical software version 30. The analysis results indicate that the product quality variable (X_1) obtained a t-value of 3.100, which is greater than the t-table value of 1.986, with a significance level of 0.003. The brand image variable obtained a t-value of 1.790, which is less than the t-table value of 1.986, with a significance level of 0.077, while the lifestyle variable obtained a t-value of 3.983, which is greater than the t-table value of 1.986, with a significance level of 0.001. From this study, it can be concluded that product quality and lifestyle have a positive and significant influence on purchase decisions, whereas brand image does not have a partial effect on purchase decisions.
