

ABSTRAK

Sri Nurhidayat, Jaelan Usman, Iswadi Amiruddin 2026, Implementasi Program Rehabilitasi Sosial dalam Pemberdayaan Penyandang Disabilitas pada Dinas Sosial Kota Makassar

Dinas Sosial Kota Makassar sebagai pelaksana tugas bidang sosial memiliki peran untuk memberdayakan penyandang disabilitas di Kota Makassar. Penelitian ini dilakukan dengan tujuan untuk mengkaji dan memahami Implementasi Program Rehabilitasi Sosial dalam Pemberdayaan Penyandang Disabilitas pada Dinas Sosial Kota Makassar.

Penelitian ini menggunakan metode deskriptif kualitatif. Penentuan informan dilakukan dengan teknik purposive sampling, sedangkan pengumpulan data dilakukan melalui observasi, wawancara, dan dokumentasi. Fokus penelitian meliputi kesesuaian antara program dan pemanfaat, kesesuaian antara program dan organisasi pelaksana, serta kesesuaian antara kelompok sasaran dan organisasi pelaksana dalam pelaksanaan Program Rehabilitasi Sosial.

Hasil penelitian mengenai implementasi Program Rehabilitasi Sosial dalam Pemberdayaan Penyandang Disabilitas pada Dinas Sosial Kota Makassar menunjukkan bahwa Program Rehabilitasi Sosial dalam pemberdayaan penyandang disabilitas telah dilaksanakan, namun pelaksanaannya belum sepenuhnya maksimal. Hal ini disebabkan masih belum tersosialisasikan dengan baik program yang diberikan kepada penyandang disabilitas sebagai penerima kelompok penerima manfaat, pelaksana pelatihan keterampilan membutuhkan kolaborasi dengan instansi lain, serta keterbatasan anggaran sehingga pemanfaatan program belum dirasakan secara merata oleh penyandang disabilitas.

ABSTRACT

Sri Nurhidayat, Jaelan Usman, Iswadi Amiruddin 2026, *Implementation of the Social Rehabilitation Program in Empowering Persons with Disabilities at the Makassar City Social Service*

The Makassar City Social Service, as an institution responsible for social welfare affairs, plays an important role in empowering persons with disabilities in Makassar City. This study was conducted to examine and understand the implementation of the Social Rehabilitation Program in empowering persons with disabilities at the Makassar City Social Service.

This research employed a descriptive qualitative method. Informants were selected using purposive sampling techniques, while data were collected through observation, interviews, and documentation. The focus of the study included the alignment between programs and their benefits, the suitability between programs and implementing organizations, as well as the compatibility between target groups and implementing organizations in the implementation of the Social Rehabilitation Program.

The results of the study indicate that the implementation of the Social Rehabilitation Program in empowering persons with disabilities at the Makassar City Social Service has been carried out; however, its implementation has not yet been fully optimal. This condition is caused by the lack of comprehensive socialization regarding the programs provided to persons with disabilities as beneficiaries, the need for collaboration with other institutions in conducting skills training, and budget limitations, resulting in uneven distribution of program benefits among persons with disabilities.
