

ABSTRACT

Andi Firhamsyah, 2020. The Implementation of Prediction Strategy in Improving Students' Reading Comprehension (Pre Experimental Research at The Eight Grade Student of SMP Satap 4 Bulukumba). A Thesis of English Department. The Faculty of Teacher Training and Education, Muhammadiyah University of Makassar. Supervised by Bahrin Amin and Amar Ma'ruf.

This was the pre-experimental research used one group pre-test and post-test design, which was aimed at found out the implementation of predicting strategy in improving students' reading comprehension at the Eight Grade students of SMP Satap 4 Bulukumba. The subjects of this research consisted of 30 students at the Eight Grade students of SMP Satap 4 Bulukumba. The technique of analyzed data in this research was applied by used quantitative data with the instruments used reading text and examine the students reading comprehension.

The result of the data were taken from tests in form of multiple choice, the test was gave to the students in form of pre-test and post-test. Based on the data, this research showed that the score of students improved from the pre-test to post-test. It was showed the mean score of the pre-test was 53,33, and the students who got point ≥ 70 were 13 students (43%). In post-test, the mean score was 82,7 and the students who got point ≥ 70 were 28 students (93%). It meant that there was teh significant improvement where the students were active, enthusiatic, and interested to teaching and learning process by used Prediction Strategy.
