

## ABSTRAK

**Rahma Santo, Andi Luhur Prianto, Rusliadi, 2026. “Manajemen dalam Pelayanan Stunting di Wilayah Kerja Puskesmas Belawae Kabupaten Sidrap.”**

Stunting merupakan salah satu permasalahan gizi kronis yang masih menjadi tantangan serius dalam pembangunan kesehatan masyarakat, khususnya di wilayah kerja Puskesmas. Penanganan stunting membutuhkan penerapan manajemen yang terencana, terarah, dan berkelanjutan dalam pelaksanaan pelayanan kesehatan. Penelitian ini bertujuan untuk menganalisis manajemen dalam pelayanan stunting di wilayah kerja Puskesmas Belawae Kabupaten Sidrap.

Metode penelitian yang digunakan adalah metode kualitatif dengan pendekatan deskriptif. Teknik pengumpulan data dilakukan melalui observasi, wawancara, dan dokumentasi dengan informan yang terdiri dari Kepala Puskesmas, Staf Gizi, Staf Manajemen, Kader Desa, serta orang tua balita. Analisis data dilakukan melalui tahapan reduksi data, penyajian data, dan penarikan kesimpulan.

Hasil penelitian menunjukkan bahwa Puskesmas Belawae telah menerapkan fungsi manajemen dalam pelayanan stunting yang meliputi perencanaan program gizi, pelaksanaan pelayanan kesehatan dan edukasi gizi, serta evaluasi untuk menilai efektivitas program yang dilaksanakan. Namun demikian, dalam pelaksanaannya masih terdapat beberapa kendala, seperti keterbatasan sumber daya dan rendahnya kesadaran masyarakat. Oleh karena itu, diperlukan penguatan koordinasi serta peningkatan peran masyarakat guna mendukung optimalisasi pelayanan stunting.

**Kata Kunci:** Manajemen, Pelayanan Stunting, Puskesmas

## ABSTRACT

***Rahma Santo, Andi Luhur Prianto, Rusliadi, 2026. "Management in Stunting Services in the Working Area of Belawae Public Health Center, Sidrap Regency."***

*Stunting is one of the chronic nutritional problems that remains a serious challenge in public health development, particularly within community health center areas. Addressing stunting requires the implementation of well-planned, directed, and sustainable management in health service delivery. This study aims to analyze management in stunting services in the working area of Belawae Public Health Center, Sidrap Regency.*

*This research employs a qualitative method with a descriptive approach. Data were collected through observation, interviews, and documentation involving informants such as the Head of the Public Health Center, nutrition staff, Village Cadres, and parents of toddlers. Data analysis was conducted through data reduction, data presentation, and conclusion drawing.*

*The results indicate that Belawae Public Health Center has implemented management functions in stunting services, including planning nutrition programs, implementing health services and nutrition education activities, and conducting evaluations to assess program effectiveness. However, several obstacles remain, including limited resources and low community awareness. Therefore, strengthening coordination and increasing community participation are necessary to optimize stunting service delivery.*
