**THE LEVEL OF KNOWLEDGE AND ATTITUDES OF ADOLESCENTS  
TOWARDS PROVOCATE ABORTION IN SMA NEGERI 1 SELAYAR**  
(xvii + 69 pages + 7 tables + 2 charts + 1 picture + 1 attachment)

**ABSTRACT**

**Background:** Juvenile delinquency is a problem that always arises in Indonesian society. One of the juvenile delinquency that is rife lately is premarital sex which ends with an abortion. Based on data at the K.H. Hospital Hayyung Kep. Selayar, in 2020 there were abortion cases, January 10 cases, February 10 cases, March 5 cases, April 8 cases, May 6 cases, June 10 cases, July 11 cases, August 8 cases, September 12 Cases, October 11 Cases, November 17 Cases, December 7 Cases.

**Objective:** To determine the level of knowledge and attitudes of adolescents at SMAN 1 Selayar towards abortion provocateurs in Kab. Kep.Selayar

**Methods:** The type of research that will be used is analytic observational research. With a cross-sectional study approach, it is done by collecting data at one time, to find out the relationship between knowledge and attitudes of adolescents regarding provocative abortion.

**Results:** 74 respondents (94.1%) had good knowledge and 74 respondents (94.1%) had good attitudes at SMAN 1 Selayar.

**Conclutions:** The level of knowledge and attitudes of students at SMAN 1 Selayar about provocative abortion are mostly at a good level of knowledge and show a very disapproving attitude towards provocative abortion that occurs among adolescents.

**Keywords:** Knowledge, Attitude, Youth, Abortus Provokatus
