Metode yang digunakan dalam penelitian ini adalah kualitatif dengan pendekatan deskriptif, melibatkan observasi dan wawancara dengan informan yang terdiri dari kepala desa, perangkat desa, dan masyarakat. Hasil penelitian menunjukkan bahwa pemerintah desa memiliki tiga peran utama: sebagai pelaksana pembangunan, fasilitator pemberdayaan masyarakat, dan distributor bantuan sosial. Pembangunan infrastruktur, seperti embung dan jalan tani, serta pelatihan untuk masyarakat, terbukti meningkatkan akses dan kualitas layanan. Namun, masih terdapat tantangan, seperti rendahnya pemahaman masyarakat dan keterbatasan anggaran. Faktor pendukung, seperti kerjasama yang baik antara pemerintah desa dan masyarakat, serta potensi sumber daya alam yang melimpah, menjadi kunci keberhasilan program.

This study aims to examine the role of village government in improving community welfare in Paccekke Village, Soppeng Riaja District, Barru Regency. The method used in this study is qualitative with a descriptive approach, involving observation and interviews with informants consisting of village heads, village officials, and the community. The results of the study indicate that the village government has three main roles: as a development implementer, a facilitator of community empowerment, and a distributor of social assistance. Infrastructure development, such as reservoirs and farm roads, as well as training for the community, has been shown to improve access and quality of services. However, there are still challenges, such as low community understanding and budget constraints. Supporting factors, such as good cooperation between the village government and the community, as well as abundant natural resource potential, are the keys to the success of the program.
