ABSTRAK

SASKIA ANASTASYA DWI PUTRI 2025. ***Pengaruh Return On Assets, Current Ratio, Debt To Equity Ratio Terhadap Harga Saham Pada Perusahaan Perbankan Yang Terdaftar Di Bursa Efek Indonesia.*** **Skripsi. Jurusan Manajemen Fakultas Ekonomi dan Bisnis Universitas Muhammadiyah Makassar. Dibimbing oleh : Alamsjah Dan A. Tenri Syahriani.**

Penelitian ini bertujuan untuk menganalisis pengaruh return on assets, current ratio dan debt to equity ratio terhadap harga saham periode 2019–2023. Metode yang digunakan adalah pendekatan kuantitatif dengan teknik regresi linier berganda. Sampel dipilih menggunakan teknik purposive sampling. Hasil penelitian data dengan menggunakan perhitungan statistik melalui aplikasi *Statistical Package for the Social Science* (SPSS) menunjukkan bahwa secara parsial return on assets berpengaruh signifikan terhadap harga saham, curent dan debt to equity ratio tidak berpengaruh signifikan terhadap harga saham. Temuan ini mengindikasikan hasil menunjukkan bahwa rasio-rasio keuangan tersebut hanya return on assets yang terbukti menjadi indikator keuangan yang dapat memengaruhi keputusan investor, sedangkan current ratio dan debt to equity ratio tidak memiliki pengaruh yang cukup berarti terhadap turun-naiknya harga pada harga saham.

Kata Kunci: *Return On Assets, Current Ratio, Debt to Equity Ratio, Harga Saham, Perbankan, Bursa Efek Indonesia.*

ABSTRACT

SASKIA ANASTASYA DWI PUTRI 2025. ***The Influence of Return on Assets, Current Ratio, and Debt to Equity Ratio on Stock Prices of Banking Companies Listed on the Indonesia Stock Exchange. Undergraduate Thesis. Department of Management, Faculty of Economics and Business, Universitas Muhammadiyah Makassar. Supervised by : Alamsjah and A. Tenri Syahriani.***

This study aims to analyze the effect of return on assets (ROA), current ratio (CR), and debt to equity ratio (DER) on stock prices during the 2019–2023 period. The method used is a quantitative approach with multiple linear regression analysis. The sample was selected using a purposive sampling technique. The research data, analyzed using the Statistical Package for the Social Sciences (SPSS), shows that return on assets has a significant effect on stock prices, while the current ratio and debt to equity ratio do not have a significant effect. These findings indicate that among the financial ratios analyzed, only return on assets serves as a reliable financial indicator influencing investor decisions, whereas the current ratio and debt to equity ratio do not have a significant impact on stock price fluctuations.
