ABSTRACT

H. A. Mappeati. 2009. The Influence of Emotional Quotient and Managerial Skill on Performance of Elementary Schools/Elementary Islamic Institutions Headmasters in Kahu Subdistrict, Bone Regency (Supervised by H. M. Ide Said DM and A. Jama`an).

This study was aimed to find out the description of emotional quotient, managerial skill and performance of elementary schools/elementary Islamic institutions headmasters, to establish the influence of emotional quotient and managerial skill on performance of elementary school/elementary Islamic institutions headmasters in Kahu Subdistrict, Bone Regency.

This study was a survey study and was conducted in elementary school/elementary Islamic institution headmasters in Kahu Subdistrict Bone Regency, South Sulawesi Province. Data were collected by delivering questionnaire to all headmasters (37 people) and superintendents (37 people). Analysis method used was descriptive and regression analysis.

Study results indicated that emotional quotient, managerial skill and performance of elementary school/elementary Islamic institutions headmasters in Kahu Subdistrict Bone Regency was good (high). Emotional quotient and managerial skill, when analyzed together, had significant influence on headmasters performance with R square value 0,795 (79,5%) and significance of 0.000. When analyzed separately, emotional quotient had partially significant influence on headmasters performance with significance of 0.068 and managerial skill also had partially significant influence on headmasters performance with significance of 0.000.
