ABSTRACT

NUR AFNI OKTAVIANTI, 2018. *The Effectiveness of Using Problem Based Learning In Improving The Students' Ability In Writing Descriptive Essays Of The Tenth Grade Students of SMAN 1 Bontomatene in Academic Year 2018/2019.* Thesis English Education Department, Education and Teacher Training, Muhammadiyah University of Makassar, Guided by **Ummi Khaerati Syam** and **Herlina Daddi**.

The aim in this research is to find out whether using Problem Based Learning to improve or not the students' ability in writing descriptive essays for the tenth grade students on SMAN 1 Bontomatene compare with traditional method to teach descriptive essay.

The researcher used experimental research. The design used in this research is Quasi-Experimental with Pre-test Post non-equivalent design. The population in this research is the tenth grade students of SMAN 1 Bontomatene in academic year 2018/2019. The sampling technique used was simple random sampling. The sample research divided in two classes; X IPA 1 as Experimental Class and X IPA 2 as Control Class. In collecting the data, the researcher used mean score and t-test to analyze the data by using formula of Gay (1998).

The finding of this research shows that teaching writing descriptive essays by using Problem Based Learning was improve the students' ability in writing descriptive essays. It is proved by t-test formula, it is known that the value of frequency $db = 29 - 1 = 28$, at the 50% significance level obtained $t\text{-table} = 2.048$. So, $t\text{-test} > t\text{-table}$ or null hypothesis H_0 is rejected and the alternative hypothesis H_1 is accepted. It means that there is any significant effect between the students taught by using problems based learning as method in learning writing descriptive essays and the students taught by using traditional method. Therefore, it can be concluded that Problem Based Learning is Effective to apply by the teacher in improving students' ability in writing descriptive essays especially for the students of SMAN 1 Bontomatene.

Keywords: Transitional signals, type of transitional signals, the accuracy.

ABSTRAK

NUR AFNI OKTAVIANTI, 2018. Efektivitas Penggunaan Pembelajaran Berbasis Masalah dalam Meningkatkan Kemampuan Siswa Dalam Menulis Esai Deskriptif Siswa Kelas X SMAN 1 Bontomatene Tahun Akademik 2018/2019. Skripsi Jurusan Pendidikan Bahasa Inggris, Pendidikan dan Pelatihan Guru, Universitas Muhammadiyah Makassar, Dipandu oleh Ummi Khaerati Syam dan Herlina Daddi.

Tujuan dalam penelitian ini adalah untuk mengetahui apakah menggunakan Problem Based Learning untuk meningkatkan atau tidak kemampuan siswa dalam menulis esai deskriptif untuk siswa kelas sepuluh di SMAN 1 Bontomatene dibandingkan dengan metode tradisional untuk mengajar esai deskriptif.

Peneliti menggunakan penelitian eksperimental. Desain yang digunakan dalam penelitian ini adalah Quasi-Experimental dengan Pre-test Post non-equivalent design. Populasi dalam penelitian ini adalah siswa kelas X SMAN 1 Bontomatene pada tahun akademik 2018/2019. Teknik pengambilan sampel yang digunakan adalah simple random sampling. Sampel penelitian dibagi dalam dua kelas; X IPA 1 sebagai Kelas Eksperimental dan X IPA 2 sebagai Kelas Kontrol. Dalam mengumpulkan data, peneliti menggunakan skor rata-rata dan uji-t untuk menganalisis data dengan menggunakan rumus Gay (1998).

Temuan dari penelitian ini menunjukkan bahwa pengajaran menulis esai deskriptif dengan menggunakan Problem Based Learning meningkatkan kemampuan siswa dalam menulis esai deskriptif. Hal ini dibuktikan dengan rumus uji-t, diketahui bahwa nilai frekuensi $db = 29 - 1 = 28$, pada taraf signifikansi 50% diperoleh t -tabel = 2,048. Jadi, uji-t table t-tabel atau hipotesis nol H_0 ditolak dan hipotesis alternatif H_1 diterima. Artinya ada pengaruh yang signifikan antara siswa yang diajar dengan menggunakan pembelajaran berbasis masalah sebagai metode dalam pembelajaran menulis esai deskriptif dan siswa yang diajar dengan menggunakan metode tradisional. Oleh karena itu, dapat disimpulkan bahwa Problem Based Learning efektif untuk diterapkan oleh guru dalam meningkatkan kemampuan siswa dalam menulis esai deskriptif terutama untuk siswa SMAN 1 Bontomatene.

Kata kunci: Sinyal transisi, jenis sinyal transisi, keakuratan.

ACKNOWLEDGMENT

Alhamdulillahi Robbil 'Alamin. The researcher expresses her biggest gratitude to the almighty Allah SWT, who has given guidance, blessing, and mercy to her in completing this thesis.

Salam and Shalawat are addressed to the final, chosen, religious messenger, the prophet Muhammad SAW. The researcher realized that in writing and compile this thesis, many people have contributed their valuable suggestion, guidance, assistance, and advice for the completion of this thesis. The researcher would like to express her appreciation and sincere thanks to all of them particularly:

- a. Dr. H. Abd Rahman. SE, MM, the Rector of Muhammadiyah University of Makassar for his advices during his studied at the university.
- b. Erwin Akib S.Pd., Ph.D, the Dekan of FKIP UNISMUH Makassar for all advices and motivation.
- c. Ummi Khaerati Syam S.Pd., M.Pd, the lead of English education department of FKIP UNISMUH Makassar, for all advices and motivation.
- d. Her high appreciation and great thankful are due to consultant Ummi Khaerati Syam S.Pd., M.Pd as the first consultant and Herlina Daddi S.Pd., M.Pd as the second consultant who has given guidance, correction, patience, and support since the preliminary state of manuscript till the completion of this thesis.

- e. The researcher deep appreciation for Drs. Rusydi Syamsul, MM as a head master of SMAN 1 Bontomatene Kab. Kep. Selayar and English teacher Andi Ompo S.Pd and all the students, especially for the X IPA 1 and X IPA 2 in academic year 2018/2019 who have spared their time and activities for being subject of this research.
- f. Her special heartfelt to her beloved parents Syahrir and Dg. Tamaming, her sisters Salsa Ariyanti and Alda Alfaningsi, and her boyfriend Priyo Saputra, and all member of anak rajin squad who always sacrifice, love, care, support for financial and pray for her safety and every success of mine.
- g. Finally, for all everybody who gave valuable suggestion, guidance, assistance, and advice to completion this thesis may Allah SWT be with us now and forever.

Makassar, December 2018

CHAPTER I

INTRODUCTION

A. Background

Writing is one of the basic competencies to communicate in teaching English. As the basic competence, writing is about the way that ideas are ordered into sentences and paragraphs to communicate to the reader of each particular piece of writing (Creme, 2013). In addition, writing includes what people think and transferring message from their thought to the written form using language (Irawati, 2015). Therefore, writing is an effective way to communicate and express our thoughts, feelings, and opinions to others in written form.

Essay is one of the written forms in writing that must be produced skill where the students should produce something such as writing essay. Then, when the students write an essay the students are making a case for the validity of a particular point of view, analysis, interpretation, or set of facts or procedures. Similarly, in the process of practicing essay writing, there are important aspects which need to be considered, such as content of the essay, organization of the essay, coherence, grammar, vocabulary and mechanics (Humaniora, 2013). Thus, to write an essay the students should be known to choosing a topic for the essay, defining the purpose, brainstorming subjects of interest, evaluating each potential topic, organizing ideas by a drawing

diagram or a writing outline, writing the body paragraphs, and checking instruction for the assignment.

Writing essays has several form, one of them is “descriptive text” that focus on describing a character, an effect, or a place in great detail (Nawawi, 2011). Thus, descriptive text is the text which describes something, someone, situation, and etc. or write about the way persons, places, or things appear. In addition, in learning descriptive text, students have problem to write although they know the topic which has been given by the teacher. The students usually confused to write their idea about the topic and still do not understand clearly what the descriptive text is, and how to describe persons, places, and things in English writing (Nawawi, 2011). Thus, they will very need the inspiration to create ideas in write an essay such as, discuss with their friends in small group that be equal.

One of the ways to help the student’s problem is Problem Based Learning (PBL). Problem Based Learning (PBL) has been experimented as pedagogy in various disciplines and contexts around the world and recognized as effective teaching-learning method. In PBL the students are organized into small groups learning. Similarly, Dharma (2014) state that in PBL group members must be heterogeneous in term of level so that the collaboration occurs among the group members in investigate the posed problems by defining the problems, gathering known facts, paraphrasing the problems, and generate solution by sharing and having discussion with their friends. In the same way, discovers PBL group showed improvements in the post-writing

test, that is, their essays were richer in terms of support and arguments for each point, while the non-PBL did not show much difference in their post-writing test (Zuhri Muhammad Dj, 2015). Therefore, this indicates that PBL enables the students to explore information which relates to the topic of their writing an essay. The more information they explore and the more inspiration they have.

Therefore, the researcher is sure that students are more interested to write an essays especially in descriptive text through problem based learning (PBL) because it can improve the students' ability in writing essays. The students will be enthusiastic in learning because whoever if discuss the actual real problems, surely most of us will be spirit to give arguments, opinions, ideas, etc. Also it stimulates the students' interest to write or it expects to activate students' prior knowledge of what topic that they should write and present ideas in writing form. The researcher will be conducting a study at seven grade of junior high school 1 Bontomatene.

Based on the statement above, the researcher is interested to do a research under the title "The effectiveness of using Problem Based Learning (PBL) in improving the students' ability in writing essays (A Quasi Experimental Research)".

B. Problem Statement

Based on the background above the researches formulate the follow research question Is PBL (Problem Based Learning) method effective to improve students' ability in writing descriptive essays?

C. Objective of The Research

Based on the problem formulation above, the objective of the research is to find out if PBL method effective to improve students' ability in writing descriptive essays.

D. Significance of the Research

Based on the research objective above, the researcher can show the research benefit such as:

1. For English teacher

Teacher will know the students problem especially of using PBL in the writing essays and teacher can increase the students understanding about the PBL in the learning activity. This research gives inspiration for the teacher to find out the technique or media to teach this material.

2. For other Researcher

Based on the explanation above the data will help other researcher to get the reference and solve the problem especially of using a PBL in making writing essays.

E. Scope of the Research

This research is restricted to the use of problem-based learning (PBL) method in improving the students' ability in writing descriptive essays. The students' essays will be scored from two components focus on content and organization.

CHAPTER II

REVIEW OF RELATED LITERATURE

A. Previous Related Research Findings

Some of the previous research findings as follow:

1. Alawia (2011) He found that the use of clustering technique has successfully improved the eight year students' writing ability in writing descriptive text. The students' responses show that they were interested to learn writing subject, because they felt easier to write using the technique.
2. Nawawi (2011) He found that teaching writing descriptive text using guided questions is effective to improve students' writing skill, to collect students' perception and impression of guided questions process, and to collect progressive result of students' participation in learning writing descriptive text.
3. Nurfadillah (2018). He found that the problems based learning has given strong effect on students' writing ability of narrative text and there was a significant effect on students' writing ability at tenth grade of SMA Negeri 1 Kota Tangerang.
4. Abubakar (2015). He did a research to improve students speaking ability through Problem Based Learning (PBL). The result of this research showed their students' participation increased 57% and their students' performance increased up to 2,59%.

The four previous result have input techniques in improve students' writing and another technique to improve the students' language skill is PBL. Meanwhile, this research will be focused on the effectiveness of using Problem Based Learning (PBL) in improving students' ability in writing essay.

B. The Concept of Writing

1. Definition of writing

Writing is one of the basic competencies to communicate in teaching English. As the basic competence, writing is about the way that ideas are ordered into sentences and paragraphs to communicate to the reader of each particular piece of writing (Creme, 2013).

Another statement about writing is the way of thinking or sending message from the writer to the reader which becomes the part of language or language skill and it's also means communications (Nawawi, 2011).

Similarly with before statement, writing is more than a medium communication. It is a way of remembering and a way of thinking. Because of that, writing is not easy. It needs a hard work. In writing we have to produce words, phrase, sentences, and paragraph at the same time (Fauzi, 2011).

Based on the various definitions above, it is clear that writing is a means of communication, and a way of expressing ideas through written form. Therefore, Writing is the process of building larger units form

smaller ones. That form the combination letter form words and to be arranged to form sentences, sentences to be arranged to make paragraph and paragraph arranged to make a writing essay.

2. Writing Process

Writing process is a private activity. Writing process can help them in composing their thought into paper. Writing process as a classroom activity incorporates the four basic writing stage-planning (Pre-writing), drafting, revising, editing, evaluating, and publishing. There are several writing process, they are:

a. planning [pre-writing]

There are several pre-writing techniques that will help to think and develop a topic and get word.

1. Group Brainstorming

Group member spews out ideas about the topic. Spontaneity is important here. There are not rights or wrong answer. Group members may have up come up with a new ideas that seemed silly or impractical, but one idea led to another, and you eventually hit on and ideas that worked.

2. Clustering

Student's form word related to a stimulus supplied by teacher. The word are circle and then linked by lines to show discernible cluster.

Clustering is simple powerful strategy.

3. Rapid Free writing

Within a limited time students can make write quickly a single word or phrase about a topic. The time limit keeps the writer's minds ticking and thinking fast. Rapid free writing is done when group brainstorming is not possible or because the personal nature of a certain topic requires a different strategy.

4. WH-Question

WH-Question is who, why, what, where, when and how question about the topic. This can help to write a paragraph which has correlation to the topic.

b. Drafting

In the second stage is drafting, in the drafting stage the writer are focused fluency of writing with grammatical accuracy. In this way, you are attempting to draw out the essay's concept. Use your first draft to.

1. Formulate a working introduction
2. Organize your ideas

c. Revising

Revising means rewriting an essay, building on what has already been done to make it stronger. Then their revise their draft, their review their draft on the feedback in given in the responding stage. There are several stages to the revising process: revising content, revising sentence and editing. You can make decisions about revising your writing:

1. Revising your sentences; revising overall structure
2. Revising your paragraph; evaluating coherence
3. Revising your words choice

d. Editing

In this stage students have prepare the final draft for evaluation by the teacher. They edit their own in grammar, spelling, punctuation, diction, sentence accuracy of supportive textual material such as quotation.

e. Evaluating

After the students has finished, the next stage is evaluation students writing. In this stage students will get score may be scoring from analytical. The criteria for evaluation should be made known to students in advance. In this way they are made more responsible for their own.

f. Publishing

The final step of writing process is publishing. This means depending on the piece you are working on:

1. Blogger need to upload, format and post their piece of completed work.
2. Students need to produce a final copy of their work, in the correct format

3. Journalist need to submit their piece (usually called “copy”) to an editor
4. Fiction writers may be sending their story to a magazine or competition.

3. Writing Goal

According to Hampton in (SofiFajaryani, 2015) says that some of writing goals are:

- a. Writers are independent when they are able to writer without much assistance.
- b. Writers gain comprehensibility when they can write, so that it can be read and understand by themselves and other.
- c. Writers are fluent when they are able to write smoothly and easily as well as understand.
- d. Writer again creativity when they can write their own ideas. Not copying what has already been written; therefore they can be read understand.

C. Essay Writing

1. The Concept of Essay Writing

An essay is a short academic composition. In composition, however, an essay is a piece of non-fiction writing that talks or discusses

a specific topic. Presently, essay is part of every degree program. Each subject has specific requirements for the essays, some subject need longer essays, while others need shorter ones, such as a five paragraph essay. In composition, the start is mad from a five-paragraph essay (David, 1979). Therefore, essay is certain person, place, or things, through the duration of the text and talk a specific topic in some paragraph.

There has been extensive research on essay as a means of assessment. While some of the findings from these studies may be relevant to the present investigation, it is important to bear in mind that the primary focus of assessment research is on essays as test or examination forms. In addition, assessment research has concentrated on essay markers rather than on essay writers, in order to determine whether the rating made by different marker on the same essays is consistent (Payne, 1974). Thus the kind of essay written by students participating in the present enquiry is longer and likely to be both more complex and more specific than the type of essay normally investigated by assessment researchers.

2. Format of an Essay

Generally, a simple a five paragraph has five paragraphs including an introduction, three body paragraphs, and a conclusion (David 1979:22). Where in introduction tell about background information, in body paragraph tell about explanation and example, and conclusion tell about summary of point.

3. Types of essay

According David (1979) there are some types of essay, such as:

a. Narrative Essay

A narrative essay is a narration like a short story. It is, however, different from a short story in that it is written in an essay format.

b. Descriptive Essay

A descriptive essay describes something to make readers feel, smell, see, taste, or hear what is described.

c. Expository Essay

An expository essay exposes things in detail to make readers understand without any complications.

d. Persuasive Essay

A persuasive essay is meant to convince the target audience to do something or not do something.

e. Argumentative Essay

An argumentative essay is meant to present arguments in the favor of something. It has an additional fourth body paragraph that is meant to present opposite argument.

f. Analytical Essay

An analytical essay is analyze something, such as in literature an analytical essay analyzes a piece of literature from different angles.

g. Comparison and Contrast Essay

A comparison and contrast essay makes either a comparison, a contrast, or both between two different or similar things.

h. Cause and Effect Essay

A cause and effect essay makes readers understand the cause of things, and their effect on other things.

i. Critical Essay

A critical essay is written on literary pieces to evaluate them on the basis of their merits or demerits.

j. Review Essay

A review essay discusses the merits and demerits of a book and evaluates it through a review.

k. Simple Essay

A simple essay is just a five-paragraph essay that is written on any topic after it is specified.

l. Research Essay

A research essay revolves around a research question that is meant to answer some specific question through a research of the relevant literature.

m. Synthesis Essay

A synthesis essay is means to synthesize different ideas to make a judgment about their merit and demerits

D. Descriptive Text

1. The definition of Descriptive Text

Descriptive is derived from the word describe. Describe means to draw, to illustrate or to picture object, place, and person in order to have visual appearance of the object described (Dirgeyasa, 2014). Therefore, Descriptive text is a text which says what a person or thing is like.

Descriptive text has a function to describe something in detail in order to enable the readers to see, hear, feel and touch it directly involve themselves in the event. The context of this kind of the text is the description of particular thing, animal, person, or others, for instance: our pets or person we know well. A good descriptive text includes many vivid sensory details that paint a picture and appeals to all of the reader's senses of sight, hearing, touch, smell and taste when appropriate. Descriptive text may also paint picture of the feeling the person, place or thing invokes in the writer.

2. The Generic Structure of Descriptive Text

Descriptive text has structure as below:

a. Identification

In this generic structure introduce to the subject of description

b. Description

In this part give details of the characteristic feature of the subject. Such as: qualities, characteristics, describing the phenomenon in parts, size, physical appearance, ability, habit, and daily live.

3. Types of Descriptive text

Most writing contains description. Following are a few types of writing that depend heavily on descriptive language (amstrong, 2001).

- a. Descriptions of a person, place or thing contain sensory details that bring to life actual people, place, and things.
- b. Observations describe an event the writer has witnessed. Often, the event takes places over an extended period of time.
- c. Travel Brochures contain factual information as well as persuasive language to encourage tourism.
- d. Character sketches describe fictional characters-their appearances, personalities, hopes and dreams.

E. The Concepts of Problem Based Learning Method

1. Nature of problem based learning

(Duch, 1995) says that PBL is an instructional method that challenges students to "learn to learn," working cooperatively in class to seek solutions to real world problems. These problems are used to engage students' curiosity and initiate learning the subject matter. Chin (2004) states that PBL is one of the active learning models that supports flexibility and creativity in learning changing knowledge and takes individual differences into consideration. It is

a learning method that places the students face-to-face with problems which they could come across in the real world, makes them aware of their importance it is based on fostering skills like solving the problem in advance, focuses on the student's activity and depends on mastery and adequacy. PBL is process of learning where small class of learners is given an unstructured real-world problem to be solved. One assumption of PBL is that the small class structure helps distribute the cognitive load among the members of the class, taking advantage of class members' distributed expertise by allowing the whole class to tackle problems that would normally be too difficult for each student alone (Pea, 1993).

Dickle (2009) argues that PBL is to gain a problem-solving ability as a result of determining, problems, looking for causes, formulating hypotheses and dealing with the knowledge and effort to prove or disprove these hypotheses, it is a multifaceted method providing possibilities for the knowledge to be used in other fields. PBL integrates all aspects of learning such as facilitation, questioning, creative and critical thinking, problem solving, cooperative learning, team building, active learning and discovery-based learning to provide for holistic learning experience (Wee, 2003).

Based on the various definitions above, it is clear that PBL is one of the teaching methods that challenges the students to learn based on the real life. Actual problems are brought into the class and discussed by the students in order to give opinions or solutions.

2. The Characteristics of Problem Based Learning

Fogarty (1997) point out the characteristics of PBL, namely: 1). Learning is started by the problems that are being happened in the real life; 2). Learning is student-centered; 3). Teacher as a coach or facilitator of learning; and 4). Students work in small class to solve/ provide multiple solutions to problems.

3. The Steps of Problem Based Learning

Santyasa (2005) writes eight steps of PBL. Those are described as follows:

a. Finding the problem

The students are given ill-defined problem which is taken to the real life problem. It is then expressed with simple sentences and gives its facts. It is also hoped to give the chance to the learners for doing research. The students use inters and intra personal intelligence for mutual understanding and mutual giving knowledge with member of class about problem that is being learning.

b. Defining the problem

In this step, the students define the problem by their own words. The problem is expressed by parameter clearly and then, the students make some definitions as prior knowledge that is so vital to be prepared. In this section, the students apply the infra-personal intelligence and their own prior knowledge to understand and define the problem.

c. Collecting the facts

The students remember again their experiences and their own prior knowledge for collecting the facts. In this step, the students use complex intelligence to look for information that is suitable with the problem discussed.

The students then organize the information by using expression "know", "need to know", and "need to do" for analyzing the problem and the facts that is based on the problem.

d. Constructing the hypotheses

Based on the discussion which has gone before, the students then construct hypotheses about the nature, of the problem, including possible mechanisms. The aim is to have the students focus on understanding the key concept which are illustrated by each problem, and this requires that they delve deeper into it.

e. Investigating the data and information

In this step, the students investigate the data and information that has been gotten and oriented to the problem. The students apply their complex intelligence to understand the information and facts which they have found. The teachers then make the structure of learning that because the students can use any ways to know and understand their condition,

f. Completing the problem that has been defined

In this section, the students complete again the problem statement by reflecting through real life that they know and understand. The students use verbal-linguistic intelligence in correcting the problem

statement by using correct words, focus to the investigation and show the facts and information clearly and also it gives the advantages in analyzing the data.

g. Concluding the solution of problem inclass collaboratively

Each class discusses the data and information that are relevant to the problem. All of the member class should give their argument, opinion, and solution about the problem. In this step, the process of problem solving is to conclude the solutions which are found from the result of discussion collaboratively in each class. Collaboration is a good method in collecting some of solutions compare with working individually.

h. Testing the solution of problem

This is the last step, the students test the solutions based on actual problem by discussing with other class for getting result and the best solution. Each class is given the opportunity to present their solution and other class may give opinion and argument. Each team will be guided in the use of a reiterative problem-solving process and will apply this problem solving process to find, analyze, and solve the problem.

4. Why Use Problem Based Learning

There are two factors influence students' interest in learning, as Junaid (1992) points out, namely external and internal factor. The internal factors

include the students' attitude toward the subject and their aptitude or linguistic ability. The external factors include the school factor, which may involve the teachers, the students and the material, family factors such as mental support and social environment factor.

PBL is one of the teaching methods that can interest the students; as we know that, PBL method places the students in small-class and provides a means by which they can investigate real problems. It can motivate the students in learning because the students learn based on the real-world problem so that students can put their opinions, feeling and solution about the problem automatically they are interested in learning. In addition, it is similar as Engel (2004) says that:

- a. PBL better prepares students to apply their learning to real-world situations.
- b. PBL enables students to become producers, rather than consumers of knowledge.
- c. PBL can, help students develop communication, reasoning and critical thinking skills.

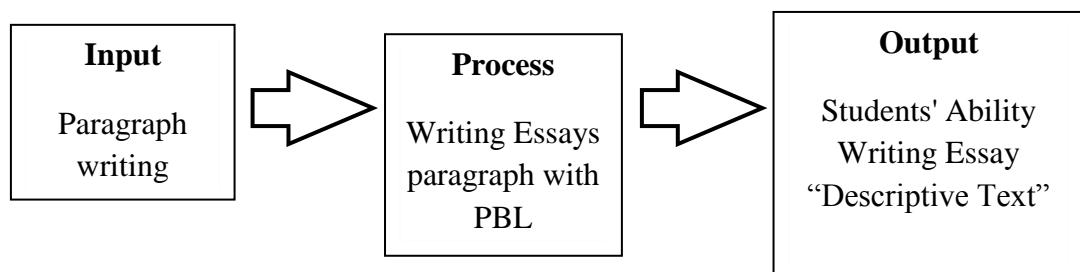

In writing activities, using PBL method can be helpful to stimulate the students to write an essay. And the problem can motivate the students to do or to write anything. By the problem the students are interested for giving arguments, opinion and so on.

F. Conceptual Framework

Good writing is determined by the quality of an essay of which demand to produce a good paragraph in their writing. To produce a good paragraph, the students have to know the characteristic of a good paragraph consist of four components namely; unity, completeness, order and coherence. In order to master four components, the students have to know content and organization.

One of the ways to help the students to make an essay is through PBL method. It will be help the students to generate and formulate ideas, feeling, and opinion in writing their essays.

Based on the theory of the research, the theoretical framework can visualize as follows:

The figure above shows the activity process of activating students in writing essays through PBL. The component of this figure is described as follows:

- 1) Input refers to the writing essays materials.

- 2) Process refers to the activities that are done by the students when write essays “descriptive text” through PBL method.
- 3) Output refers to the result of the teaching and process to write essays “descriptive text” through PBL method.

G. Hypothesis

1. Null Hypothesis (Ho): There is no significant difference of students' paragraph writing ability before and after using PBL method.
2. Alternative Hypothesis (Hi): There is a significant difference of students' paragraph writing ability before and after using PBL method.

CHAPTER III

RESEARCH METHOD

A. Research Design

This study was used Quasi-Experimental design. The object of the study was used two classes; one class as an experimental class which get a treatment and the other class are as a control class. This study was focused on nonequivalent control class design. The formula of this design is shown in table 3.1 as follows:

Table 3.1s

The Experimental Design

Class	Pretest	Treatment	Posttest
Experimental	O ₁	X ₁	O ₂
Control	O ₁	X ₀	O ₂

Where:

O₁ = Pretest

O₂ = Posttest

X₁ = PBLTreatment

X₀ = Control Treatment

B. Variable

There are two variable in this study were the independent variable and dependent variable that was involve in knowing the improvement of students' ability towards the give treatments where the used of PBL (Problem Based Learning) method as the independent variable and writing essays score as the dependent variable.

C. Population and Sample

1. Population

The population of this research was being taken from first grade of SMA NEGERI 1 BONTOMATENE in the academic 2017/2018. There are three classes those are CLASS X IPA 1, X IPA 2, and X IPA 3. The number of the research population are 88 students.

2. Sample

This research was applied simple random sampling because this technique used a member of samples from the population done at random without pay attention to the strata in the population and considered homogen, where X.1 as experimental class and X.2 as the control class. The number of the research samples was take 29 students.

D. Instruments

The instrument of this research was writing test. The researcher was applying writing test in pre-test and post-test segment as follows:

1. The pre -test was being used to find out the students prior level of writing mastery. It was conducted at the first meeting.
2. The post-test was being designed to find out the effectiveness and the improvement of the treatment by using problem based learning method and it was conducted the last meeting in the class after the treatment.

E. Procedure Of Data Collection

The procedure in collecting is presented in as follows:

1. Pre-test, researcher was given it before doing the treatment at the first meeting in class. In this case, the researcher was began the activity by giving the list of topic about descriptive essays.
2. Treatment, after giving a pre-test the students are being treated by using Problem Based Learning Method. Where the first thing that the researcher was does is introduction to the students about what the Problem Based Learning is?
3. Post-test, researcher was given it after doing the treatment in the class. It is aimed at finding out the value of treatment whether the result of the post-test is better than pre-test.

F. Data Analysis

After collecting the data by using the instruments, the researcher was analyzing it. The process of the data analysis has conduct on the pre-test and post-test scores. To find out the students improvement in writing essays by using PBL after the treatment, the data from final test scores is used. The result will be shown on the students' writing essays in experimental class after treatment given.

1. Scoring Sheet for Writing Test Data Analysis

Students' pieces writing will analyze by the scoring guide based on An Interactive Approach to Language Pedagogy by (Dastgeer G, 2015). The scoring guide will choose as the criteria of scoring represent the basic aspects of writing descriptive essays.

They are content, organization, grammar, vocabulary, and mechanic. In this study was focused on examining in five aspects, they are organization, grammar, vocabulary, mechanic, and content. The organization represents how effective the writer introduces the beginning, establishes the connections and relationships between events, actions, details, and brings closure to the writing descriptive essays. Grammar is the structure of written or spoken language it refers to the part of speech and how they combine together to form sentences. Mechanic refers to the rules of the written language, such as capitalization, punctuation, and spelling. Vocabulary is a set of familiar words within a person's language. Meanwhile, the content assesses the event that students' describe or make descriptive essays.

a. Content

Table 3.2
Analysis Content

Classification	Score	Criteria
Excellent	90 – 100	the event is well describe, going readers very clear information to gain the aim.
Very good	80 – 89	The event are quite compherensible, adequate relevant, generally well development.
Good	70 – 79	The event is adequately describe, going reader sufficient information to gain the aim.
Fair	60 – 69	The event are not clearly stated, the idea are get limit to support, not quite relevant, the ideas are lack of developing.

Poor	<59	The event is a poorly described going the readers incomplete information to gain the aim.
------	-----	---

(Dastgeer G, 2015)

b. Organization

Table 3.3
Analysis Organization

Classification	Score	Criteria
Excellent	90-100	Fluent expression ideas clearly
very good	80-89	Somewhat copy/ loosely organize but mind ideas stand out
Good	70- 79	Not fluent but ideas stand out
Fair	60-69	Not fluent and ideas confuse or disconnect.
Poor	>59	Does not communicate, no organization

(Dastgeer G, 2015)

c. Vocabulary

Table 3.4
Analysis Vocabulary

Classification	Score	Criteria
Excellent to very good	80-100	Effective word/idiom choice and usage and word form mastery, appropriate register.
Good	70-79	Adequate range, frequent errors of word/idiom form, choice, usage, and meaning confused or obscured.
Fair	60-69	Limited range, frequent errors of word from, choice usage, meaning confused or obscured.
Poor	>59	Essentially translation, Little Knowledge of English vocabulary, word from of not enough to evaluate.

(Dastgeer G, 2015)

d. Mechanic

Table 3.5

Analysis Mechanic

Classification	Score	Criteria
Excellent to very good	80-100	Demonstrates mastery of conventions, few errors of spelling, capitalization, paragraphing.
Good	70-79	Occasional errors of spelling, capitalization, paragraphing but meaning not obscured.
Fair	60-69	Frequent errors of spelling, capitalization, paragraphing, poor handwriting, meaning confused or obscured.
Poor	>59	No mastery of conventions, dominated by errors of spelling, capitalization, paragraphing, handwriting illegible or not enough to evaluate.

(Dastgeer G, 2015)

e. Grammar

Table 3.6
Analysis Mechanic

Classification	Score	Criteria
Excellent to very good	80-100	Effective complex constructions, few errors of agreement, tense, number, word order/function, articles, prepositions.
Good	70-79	Effective but simple construction, minor problems in complex constructions, several errors of agreement, tense, number, word order/function, articles, prepositions but meaning seldom obscured.
Fair	60-69	Major problems in simple/complex constructions, frequent errors of negation, agreement, tense, number, word order/function, articles, prepositions and fragments, meaning confused or obscured.
Poor	>59	Virtually no mastery of sentence constructions rules, dominated by errors, does not communicate or not enough to evaluate.

(Dastgeer G, 2015)

From the basic standard above the researcher uses the standard score for the total value of the students' writing by calculating the standard score given, as follows:

- 1) Scores 90-100 is classified as excellent.
- 2) Scores 80-89 is classified as very good.
- 3) Scores 70- 79 is classified as good.
- 4) Scores 60-69 is classified as fair.
- 5) Scores >59 is classified as poor.

2. Data Analysis on Pre-test and Post-test

The data was collected through pre-test (score) would analyze quantitatively through the follow steps:

- a. Finding out the mean score by using formula:

$$X = \frac{\Sigma X}{N}$$

Where: X : Mean Score

ΣX : The Number of all Score

N : The Number of Students

(Gay, 1998)

- b. Finding out the significant difference between control and experimental class by calculating the of t-test

$$t = \frac{\bar{x}_1 - \bar{x}_2}{\sqrt{\left(\frac{SS_1 + SS_2}{n_1 + n_2 - 1}\right)\left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

$$\text{where } SS_1 = \Sigma x_1^2 - \frac{(\Sigma x_1)^2}{n_1} \text{ and } SS_2 = \Sigma x_2^2 - \frac{(\Sigma x_2)^2}{n_2}$$

Where:

t	: Test of significance
X_1	: Mean Score of Experimental Class
X_2	: Mean Score of Control Class
SS_1	: Sum of Square of Experimental Class
SS_2	: Sum of Square of Control Class
n_1	: Subject of Experimental Class
n_2	: Subject of Control Class

(Gay, 1998)

CHAPTER IV

RESEARCH FINDINGS AND DISCUSSION

A. Research Design

The objective of the research is to find out whether or not PBL method effective to improve students' ability in writing descriptive essays. The researcher was chosen two classes as the sample of research. They are X IPA 1 consist 29 students as an experimental class and X IPA 2 consist 29 students as a control class.

There were several sections that would be explored. they were to know that the mean score in experimental and control class, and t-test results in pre-test result and post-test result. Each section is presented in detail is presented as follows:

1. The Mean Score in Experimental and Control Class

a. Experimental Class

Experimental Class is a class was taught by using problems based learning method to teach writing descriptive essays. Experimental class consists of 29 students. The score of pre-test and post-test in experimental class, as follow:

Table 4.1
The Students' Score of Experimental Class
(Using Problem Based Learning Method)

Students (X)	Pre- Test Score	Post- Test Score	Gained (d) Score	Categorization in Post Test Score
			Post Test-Pre Test	
1	65	78	13	Good
2	60	79	19	Good
3	65	80	15	Excellent
4	70	85	10	Excellent
5	50	79	29	Good
6	65	78	28	Good
7	55	75	25	Good
8	65	78	13	Good
9	55	79	24	Good
10	60	79	29	Good
11	65	79	14	Good
12	55	78	23	Good
13	55	78	23	Good
14	50	79	29	Good
15	55	75	20	Good
16	65	78	13	Good
17	55	79	24	Good
18	55	85	30	Excellent

19	55	80	25	Excellent
20	70	85	15	Excellent
21	65	80	15	Excellent
22	55	76	21	Good
23	50	75	25	Good
24	60	80	20	Excellent
25	70	85	15	Excellent
26	55	75	25	Good
27	65	79	14	Good
28	65	78	13	Good
29	55	78	23	Good
X (Mean)	59.31	79.03	22.31

29	S029	18	15	13	16	16	78	15.6	243.36
Mean		17.58	15.17	13.34	15.82	17.03	79.03	15.80	7.255.12

Based on the table, the students' test was obtained from writing component, that are content, organization, grammar, mechanic and vocabulary. The mean score content in pre-test in experimental is 13.06 and post-test is 17.58, organization the mean score is 11.96 and 15.17, mean score in grammar is 10.58 and 13.34, while the mean score in mechanic is 11.27 and 15.82, and last is vocabulary the mean score is 12.55 and 17.03. It can be conclude component writing was increase with score 59.31 in pre-test and 79.03 in post-test.

Table 4.4 Minimum, Maximum and Mean of Experimental Class

Descriptive Statistics

Type of test	N	Minimum	Maximum	Mean

Pre-test Experimental	29	50	70	59.31
Post-test Experimental	29	75	85	79.03
The improvement	29	13	29	22.31

Based on the table the researcher found that the total score of pre-test in experimental class. The mean score of the total pre-test is 59.31, the minimum is 50, the maximum is 70. In post-test, the mean score is 79.03, the minimum is 75, the maximum is 85. While the improvement, the mean score is 22.31, the minimum is 13 and the maximum is 29.

The data analysis of score provided in table showed that the score of the students' pre-test are started 50-70 and the score of students' post-test are started 75 until 85.

b. Control Class

Control Class is a class that was taught by using traditional method in learning descriptive essays. This control class is X IPA 2 which consists of 29 students the data obtained from pre-test and post-test given to the control class. The score of pre-test and post-test in control class, as follow:

Table 4.5 Students' Score of Control Class

(Without Problem Based Learning Method)

Students (X)	Pre- Test Score	Post- Test Score	Gained (d) Score Post Test-Pre Test	Categorization in Post Test Score

23.	D023	16	14	13	15	17	75	15	225

24.	D024	17	15	13	15	16	76	15.2	231.04
25.	D025	17	14	12	14	15	72	14.2	201.64
26.	D026	17	15	14	15	16	77	15.4	237.16
27.	D027	17	14	12	13	17	73	14.6	213.16
28.	D028	18	14	12	15	17	76	15.2	231.04
29.	D029	17	14	12	14	15	72	14.4	207.36
Mean		17.37	14.65	12.93	15.10	16.72	76.86	15.36	6.853.90

Based on table, the students' test was obtained from writing component, that are content, organization, grammar, mechanic, vocabulary. The mean score content in pre-test in experimental is 12.44 and post-test is 17.37, organization the mean score is 11.48 and 14.65, mean score in grammar is 10.17 and 12.93, while the mean score in mechanic is 10.89 and 15.10, and the last is vocabulary the mean score is 12.06 and 16.72. It can be conclude component writing was increase in content with score 56.89 in pre-test and 76.86 in post-test.

Table 4.8

Minimum, Maximum, and Mean, of Control Class

Descriptive Statistics

Type of test	N	Minimum	Maximum	Mean

Pre-test Experimental	29	50	70	56.89
Post-test Experimental	29	72	80	76.86
Valid N (listwise)	29	11	28	19.66

Based on the table the researcher found that the total score of pre-test in control class. The mean score of the total pre-test is 56.89, the minimum is 50, the maximum is 70. In post-test, the mean score is 76.86, the minimum is 72, the maximum is 80. While the improvement, the mean score is 19.66, the minimum is 11 and the maximum is 28.

The data analysis of score provided in table showed that the score of the students' pre-test are started 50-70 and the score of students' post-test are started 72 until 80.

2. The significance difference between control and experiment class by calculating the of t-test

This research, the researcher used t-test to know that there significance difference between control and experimental class. T-test used to differentiate if the students' result of writing on descriptive essay taught by using problem based learning method id significance or not. The researcher used the Gay formula to analyze t-test. This research the Null hypothesis (H_0) states that there is no significant effect of students' ability in writing descriptive essays of tenth grade students of SMAN 1 Bonomatene in the academic year 2018/2019. While the alternative Hypothesis (H_1) states there is a significant

effect of students' ability in writing descriptive essays of tenth grade students of SMAN 1 Bontomatene in the academic years 2018/2019.

The basic read value of significant t-test: if value of significant higher than 0.05, H_0 accepted and H_1 rejected. While if value is significant or lower than 0.05, H_0 rejected and H_1 accepted.

B. Discussion

The aim in this research was using problem based learning to improve the students' ability in writing descriptive essays and it was expected that used real world problems with problem based learning method improve the students' ability in writing descriptive essays. Referring to the comparison between pre-test and post-test of the experimental class, there was an increase on students' score where pre-test and the post-test score. It can be concluded the students score pre-test and post-test had significance different. In the other word, the students' score in experimental class was significantly different with the students score in control class after treatment on the use problem based learning method between lecturing methods.

The result showed the students writing skill increased especially in content and vocabulary after applied problems based learning method in experimental class. It is different mean score in control class applied lecturing method. Both class increased content and vocabulary but experimental class is highest. This increase was due problem based learning method in class.

Applying problems based learning method the students must get directly the real life problems especially in teaching writing descriptive essays.

The students could know the real life problems and make the students more enjoyable, make the students idea increase in content and vocabulary different between the students just know the explanation by the teacher without do not make the students know the real life problems of the object.

Besides, the result of pre-test in experimental class showed the students organization, mechanic, and grammar was increased in pre-test and post-test after treatment. Therefore, it could be concluded that the use of problems based learning method in experimental class improve the students ability in writing descriptive essays.

Actually, the procedure of this research was rather with the previous research conducted by Nurfadillah (2018) because in both research, problems based learning was method to improving writing skill. However, the techniques of analysis data were rather different. The technique of analysis data in Nufadillah's study was using SPSS 2.1 whether this research was using formula of Gay (1998). In addition, there were 4 criteria showed to analyze the students' writing ability in Nurfadillah's research such as development of ideas, organization, clarity of language, knowledge of language and conventions that the data showed the mean score of both classes was increased same with this research that the mean score of both classes was increased but the scoring guide in this research was choose as the 5 criteria in analyze the students' writing ability, they are content, grammar, mechanic, vocabulary and organization.

The other researches, the implementation problems based learning method in writing subject to the students' creative thinking ability Utary (2017) same as this research because in both research used problem based learning was method to improving writing skill. However, the previous studies in Utari's were used quantitative and qualitative data analysis technique to get final conclusion. In contrast, this research was used quasi-experimental design and was used two classes: one class as an experimental class which get a treatment and the other class are as a control class. Both researches were quantitative design of how the problems based learning was implemented in this study were also similar. The first steps is finding the problem, then defining the problem, collecting the facts, constructing the hypothesis, investigating the data and information, completing the problem, concluding the solution and the last testing the solution.

Then, the result of pre-test in experimental class showed the students' content mean score and mean score of vocabulary was increase with due problems based learning in classroom. Similarly with Chin (2004) states that PBL is one of the active learning models that supports flexibility and creativity in learning changing knowledge and takes individual differences into consideration.

Furthermore, teachings writing descriptive essay using problems based learning method improve the students' motivation and increase their critical thinking in writing descriptive essays. It similar as Engel (2004) says that PBL can help students develop communication, reasoning and critical

thinking skills. Based on the result of research problems based learning is effective to apply in classroom.

Therefore, in conclusion the use of problems based learning at the grade students' of senior high school at SMAN 1 Bontomatene can improved students' ability in writing descriptive essays especially in component like conten, grammar, vocabulary, mechanic and organization. Then, problems based learning can apply to teach writing descriptive essays.

CHAPTER V

CONCLUTION AND SUGGESSTION

A. Conclusion

Based on the analysis of this research, showed that the result of t-test formula to test the hypothesis of this research. The result that in significance in experimental class was 0.55 and 0.28 in control class and another result of the data analysis is the mean score different of experimental class was 79.03 while the mean score of control class is 76.86. The data shows that the mean scores of class taught by using problems based learning method as experimental class is higher than the mean score of class taught using traditional method as a control class. Therefore, it means that the answer of research problems was proven that using problems based learning method is effective to improve the students' ability in writing descriptive essays.

B. Suggesstion

Based on the conclusion above, the researcher suggest as follow:

1. For English Teacher
 - a. The teacher should improve their teaching ability especially in writing

- b. The teacher should prepare a good technique, method and strategies in teaching writing descriptive essays.
- c. The teacher should give motivation for the students when learning in classroom.

2. For other Researcher

- a. This research is hoped to be the new experience in teaching learning process, especially in teaching writing and also hoped this paper can be little contribution to teach English.
- b. The other researchers can implement PBL method in other researches with other skills, because the students are enjoying with this learning method and it can be helpful in other researches.

INSTRUMENT

A. Pre-test

The teacher begin the learning process with tell about natural phenomenon to the students' and connect to the subject of learning process such as descriptive text. Then, the teacher gives some topic to the students to describe the topic such as:

- a. Flood
- b. School
- c. Education

B. Post-test

The teacher divides the students to be some group. Then, give them some different topic to each group and the students' describe the topic with their group. The topic such as:

- a. Global Warming
- b. School
- c. Fire
- d. Tsunami

APPENDIX 2

LESSON PLAN

MATA PELAJARAN : BAHASA INGGRIS

KELAS : VII

NAMA SEKOLAH : SMP 1 BONTOMATENE

WAKTU : 5 X Pertemuan 4x45 menit)

A. Kompetensi Inti

KI. 1 : Menanggapi dan mengamalkan ajaran agama yang dianutnya

KI. 2 : Menghargai perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong), santun, percaya diri, dalam berinteraksi

secara efektif dengan lingkungan social dan alam dalam jangkauan

pergaulan dan keberadaannya

KI. 3 : Memahami pengetahuan (factual, konseptual, dan procedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya, terkait fenomena dan kejadian tampak mata.

KI. 4 : Mencoba mengolah dan menyaji dalam ranah konkret (menggunakan, mengurai, merangkai, memodifikasi, membuat) ranah abstrak (menulis) sesuai dengan yang dipelajari disekolah dan

sumber lain yang sama dalam sudut pandang/teori.

B. Kompetensi Dasar

1.1 Mensyukuri kesempatan dapat mempelajari bahasa inggris sebagai bahasa

pengantar komunikasi internasional yang diwujudkan dalam semangat belajar.

2.3 Menunjukkan perilaku tanggung jawab, peduli, kerja sama, dan cinta damai, dalam melaksanakan komunikasi fungsional.

3.10 Memahami fungsi social, struktur teks, dan unsur kebahasaan dari teks

deskriptif dengan menyatakan dan menanyakan tentang deskripsi tempat

dan benda, sangat pendek dan sederhana, sesuai dengan konteks penggunaannya.

4.13 Menyusun teks deskriptif dalam bentuk tulisan, sangat pendek dan sederhana, tentang alam dan tempat, dengan memperhatikan fungsi social, struktur teks, dan unsur kebahasaan, secara benar dan sesuai konteks.

C. Indikator Pembelajaran

3.1. Dengan diberikan teks deskriptif sederhana siswa dapat mengidentifikasi

fungsi social dengan benar.

3.2. Dengan diberikan teks deskriptif sederhana siswa dapat mengidentifikasi

ciri kebahasaan dengan benar

4.1. Siswa dapat menulis teks deskriptif sederhana dengan unsur kebahasaan

dan struktur teks dengan benar.

D. Model/Metode Pembelajaran

- Metode : Problem Based Learning
- Teknik : Diskusi
- Media : Picture
- Materi Pembelajaran :
 1. Definition of descriptive text :

Descriptive is derived from the word describe. Describe means to draw, to illustrate or to picture object, place, person in

order to have visual appearance of the object described and

Descriptive text is a text which says what a person or thing is like.

Social function is describe, tell, identification and etc.

2. Structure text

Generic structure	Sentence
Identification	Tsunami is Natural disaster
Description	Tsunami usually happens if the size of the earthquake exceed until 7 on the Richter scale. This tsunami is quite dangerous , mainly for those who live around the beach. With great force , it will sweep out whatever around it.

3. Unsur kebahasaan

- (1) Penyebutan kata benda singular dengan *a* dan *the*, dan plural (-s)
- (2) Kata ganti *it*, *they*, *she*, *we*, and etc.; *our*, *my*, *your*, *their*, and ect.
- (3) Kata sifat yang sangat lazim *old*, *fat*, *tall*, *short*, *beautiful*, *patient*, *nice*, *wise*, *smart*, and etc.
- (4) Kata kerja untuk menyatakan keadaan dan tindakan rutin dalam simple present tense: *be*, *have*, *has*, *like*, *love*, and ect.
- (5) Penggunaan nominal singular plural secara tepat atau tanpa *a*, *the*, *this*, *those*, *my* *their*, secara tepat dalam frasa nominal.

E. Kegiatan Pembelajaran

❖ Pertemuan pertama

Rincian Waktu	Waktu
Pendahuluan/Kegiatan Awal 1. Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas. 2. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas.	15 Menit
Kegiatan Inti 1. Guru menjelaskan logistic yang diperlukan, mengajukan fenomena atau demonstrasi atau cerita untuk memunculkan masalah, dan memotivasi siswa untuk terlibat dalam aktivitas pemecahan masalah. 2. Guru memberikan beberapa teks deskriptif dan meminta siswa untuk mengamati teks tersebut. 3. Siswa menanyakan hal-hal atau masalah-masalah yang ada dalam teks deskriptif tersebut. 4. Guru meminta siswa untuk mengumpulkan informasi mengenai teks deskriptif tersebut melalui buku atau pun internet. 5. Guru menjelaskan apa itu teks deskritif, bagaimana unsur kebahasaan dan generic structure dari teks deskriptif. 6. Guru meminta siswa untuk mengasosiasikan atau menemukan struktur dari teks deskriptif 7. Siswa mengajukan hasil kerja mereka kepada guru.	60 Menit

<p>Kegiatan Akhir</p> <ol style="list-style-type: none"> 1. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya. 2. Guru kembali mengevaluasi peserta didik dengan menanyakan kembali defenisi dan pembahasan tentang deskriptif teks dengan menunjuk salah satu siswa. 3. Guru memberikan tugas rumah atau latihan kepada siswa 4. Kesimpulan dari pertemuan atau pembelajaran. 5. Doa sebelum pulang. 6. Salam. 	15 Menit

❖ Pertemuan kedua

Rincian Waktu	Waktu
<p>Pendahuluan/Kegiatan Awal</p> <ol style="list-style-type: none"> 1. Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas. 2. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas. 	15 Menit

<p>Kegiatan Inti</p> <ul style="list-style-type: none"> 3. Guru mereview materi pada pertemuan pertama 4. Guru memberikan gambar (1) mengenai bencana alam dan meminta siswa mengamati gambar tersebut. 5. Siswa menanyakan hal-hal atau masalah-masalah yang ada pada gambar tersebut. 6. Siswa mengumpulkan informasi mengenai hal-hal atau masalah-masalah pada gambar tersebut melalaui artikel, buku atau pun internet. 7. Guru kemudian membagi siswa menjadi beberapa kelompok 8. Guru memberikan 1 topik masalah (flood) untuk setiap kelompok 9. Siswa menginvestigasi atau menemukan hal-hal atau masalah-masalah mengenai topic yang diberikan oleh guru 10. Siswa mendiskusikan masalah-masalah yang telah dinvestigasi dan memberikan solusi terhadap masalah-masalah yang telah diinvestgasi. 11. Siswa mengumpulkan informasi-informasi mengenai pemcahan masalah dari topic masalah yang telah diberikan oleh guru. 12. Siswa menyusun hal-hal- atau masalah-masalah mengenai topic yang telah diberikan oleh guru kedalam bentuk deskriptif essay. 13. Siswa mengajukan hasil kerja kepada guru 14. Setiap kelompok mempresentasikan hasil kerja mereka didepan kelas. 15. Guru meminta siswa dari kelompok lain bertanya mengenai pernyataan atau hasil kerja yang telah 	60 Menit
--	----------

<p>dipräsentasikan oleh teman dari kelompok lain.</p> <p>16. Guru memberikan penguatan terhadap hasil kerja siswa</p>	
<p>Kegiatan Akhir</p> <p>17. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya.</p> <p>18. APPENDIX 3

LESSON PLAN

MATA PELAJARAN : BAHASA INGGRIS

KELAS : VII

NAMA SEKOLAH : SMP 1 BONTOMATENE

WAKTU : 5 X Pertemuan 4x45 menit)

C. Kompetensi Inti

KI. 1 : Menanggapi dan mengamalkan ajaran agama yang dianutnya

KI. 2 : Menghargai perilaku jujur, disiplin, tanggung jawab, peduli (toleransi, gotong royong), santun, percaya diri, dalam berinteraksi

secara efektif dengan lingkungan social dan alam dalam jangkauan

pergaulan dan keberadaannya

KI. 3 : Memahami pengetahuan (factual, konseptual, dan procedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya, terkait fenomena dan kejadian tampak mata.

KI. 4 : Mencoba mengolah dan menyajikan dalam ranah konkret (menggunakan, mengurai, merangkai, memodifikasi, membuat) ranah abstrak (menulis) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang/teori.

D. Kompetensi Dasar

1.1 Mensyukuri kesempatan dapat mempelajari bahasa Inggris sebagai bahasa

pengantar komunikasi international yang diwujudkan dalam semangat belajar.

2.3 Menunjukkan perilaku tanggung jawab, peduli, kerja sama, dan cinta damai, dalam melaksanakan komunikasi fungsional.

3.10 Memahami fungsi social, struktur teks, dan unsur kebahasaan dari teks

deskriptif dengan menyatakan dan menanyakan tentang deskripsi tempat

dan benda, sangat pendek dan sederhana, sesuai dengan konteks penggunaannya.

4.13 Menyusun teks deskriptif dalam bentuk tulisan, sangat pendek dan sederhana, tentang alam dan tempat, dengan memperhatikan fungsi social, struktur teks, dan unsur kebahasaan, secara benar dan sesuai konteks.

C. Indikator Pembelajaran

3.1. Dengan diberikan teks deskriptif sederhana siswa dapat mengidentifikasi

fungsi social dengan benar.

3.2. Dengan diberikan teks deskriptif sederhana siswa dapat mengidentifikasi

ciri kebahasaan dengan benar

4.1. Siswa dapat menulis teks deskriptif sederhana dengan unsur kebahasaan

dan struktur teks dengan benar.

D. Model/Metode Pembelajaran

- Pendekatan : Pengamatan dan Ceramah
- Teknik : Ceramah dan kelompok
- Media : Gambar

- Materi Pembelajaran :

 4. Definition of descriptive text :

Descriptive is derived from the word describe. Describe means to draw, to illustrate or to picture object, place, person in order to have visual appearance of the object described and Descriptive text is a text which says what a person or thing is like. Social function is describe, tell, identification and etc.

5. Structure text

Generic structure	Sentence
Identification	Tsunami is Natural disaster
Description	Tsunami usually happens if the size of the earthquake exceed until 7 on the Richter scale. This tsunami is quite dangerous , mainly for those who live around the beach. With great force, it will sweep out whatever around it.

6. Unsur kebahasaan

- (6) Penyebutan kata benda singular dengan *a* dan *the*, dan plural (-s)
- (7) Kata ganti *it, they, she, we*, and etc.; *our, my, your, their*, and ect.
- (8) Kata sifat yang sangat lazim *old, fat, tall, short, beautiful, patient, nice, wise, smart*, and etc.
- (9) Kata kerja untuk menyatakan keadaan dan tindakan rutin dalam simple present tense: *be, have, has, like, love*, and ect.

- (10) Penggunaan nominal singular plural secara tepat atau tanpa *a*, *the*, *this*, *those*, *my* *their*, secara tepat dalam frasa nominal.

E. Kegiatan Pembelajaran

❖ Pertemuan pertama

Rincian Waktu	Waktu
Pendahuluan/Kegiatan Awal <ul style="list-style-type: none"> 3. Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas. 4. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas. 	15 Menit
Kegiatan Inti <ul style="list-style-type: none"> 8. Guru memberikan beberapa gambar tempat kepada siswa 9. Guru mengajak siswa mengamati gambar tersebut. 10. Siswa menanyakan hal-hal mengenai gambar tersebut 11. Guru meminta siswa untuk mengumpulkan informasi mengenai gambar tersebut melalui buku atau pun internet. 12. Guru menjelaskan apa itu teks deskritif, bagaimana unsur kebahasaan dan generic structure dari teks deskriptif. 13. Guru meminta siswa untuk mengasosiasikan atau menemukan struktur dari teks deskriptif 	

14. Siswa mengajukan hasil kerja mereka kepada guru.	60 Menit
<p>Kegiatan Akhir</p> <p>7. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya.</p> <p>8. Guru kembali mengevaluasi peserta didik dengan menanyakan kembali defenisi dan pembahasan tentang deskriptif teks dengan menunjuk salah satu siswa.</p> <p>9. Guru memberikan tugas rumah atau latihan kepada siswa</p> <p>10. Kesimpulan dari pertemuan atau pembelajaran.</p> <p>11. Doa sebelum pulang.</p> <p>12. Salam.</p>	15 Menit

❖ Pertemuan kedua

Rincian Waktu	Waktu

<p>Pendahuluan/Kegiatan Awal</p> <p>23. Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas.</p> <p>24. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas.</p>	<p>15 Menit</p>
<p>Kegiatan Inti</p> <p>25. Guru mereview materi pada pertemuan pertama</p> <p>26. Guru membagi siswa menjadi beberapa kelompok</p> <p>27. Guru memberikan 1 topik untuk setiap kelompok</p> <p>28. Siswa mendiskusikan topic tersebut dengan teman kelompoknya</p> <p>29. Siswa mengumpulkan informasi-informasi mengenai topic yang telah diberikan oleh guru.</p> <p>30. Siswa menyusun informasi mengenai topic yang telah diberikan oleh guru kedalam bentuk deskriptif essay.</p> <p>31. Siswa mengajukan hasil kerja kepada guru</p> <p>32. Setiap kelompok mempresentasikan hasil kerja mereka didepan kelas.</p>	<p>60 Menit</p>

<p>Kegiatan Akhir</p> <p>33. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya.</p> <p>34. Guru kembali mengevaluasi peserta didik dengan menanyakan kembali pembahasan yang telah didiskusikan dengan menunjuk salah satu siswa.</p> <p>35. Guru memberikan tugas rumah atau latihan kepada siswa</p> <p>36. Kesimpulan dari pertemuan atau pembelajaran.</p> <p>37. Doa sebelum pulang.</p> <p>38. Salam.</p>	<p>15 Menit</p>
---	-----------------

❖ Pertemuan ketiga

Rincian Waktu	Waktu
<p>Pendahuluan/Kegiatan Awal</p> <p>1. Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas.</p> <p>2. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas.</p>	15 Menit
<p>Kegiatan Inti</p> <p>3. Guru mereview materi pada pertemuan sebelumnya</p> <p>4. Guru memberikan 1 topik untuk setiap kelompok</p> <p>5. Siswa mendiskusikan topic tersebut dengan teman kelompoknya</p> <p>6. Siswa mengumpulkan informasi-informasi mengenai topic yang telah diberikan oleh guru.</p> <p>7. Siswa menyusun informasi mengenai topic yang telah diberikan oleh guru kedalam bentuk deskriptif essay.</p>	

<p>8. Siswa mengajukan hasil kerja kepada guru</p> <p>9. Setiap kelompok mempresentasikan hasil kerja mereka didepan kelas.</p>	60 Menit
<p>Kegiatan Akhir</p> <p>10. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya.</p> <p>11. Guru kembali mengevaluasi peserta didik dengan menanyakan kembali pembahasan yang telah didiskusikan dengan menunjuk salah satu siswa.</p> <p>12. Guru memberikan tugas rumah atau latihan kepada siswa</p> <p>13. Kesimpulan dari pertemuan atau pembelajaran.</p> <p>14. Doa sebelum pulang.</p> <p>15. Salam.</p>	15 Menit

❖ Pertemuan keempat

Rincian Waktu	Waktu

<p>Pendahuluan/Kegiatan Awal</p> <p>16. Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas.</p> <p>17. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas.</p>	15 Menit
<p>Kegiatan Inti</p> <p>18. Guru mereview materi pada pertemuan sebelumnya</p> <p>19. Guru memberikan 1 topik untuk setiap kelompok</p> <p>20. Siswa mendiskusikan topic tersebut dengan teman kelompoknya</p> <p>21. Siswa mengumpulkan informasi-informasi mengenai topic yang telah diberikan oleh guru.</p> <p>22. Siswa menyusun informasi mengenai topic yang telah diberikan oleh guru kedalam bentuk deskriptif essay.</p> <p>23. Siswa mengajukan hasil kerja kepada guru</p> <p>24. Setiap kelompok mempresentasikan hasil kerja mereka didepan kelas.</p>	60 Menit

<p>Kegiatan Akhir</p> <p>25. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya.</p> <p>26. Guru kembali mengevaluasi peserta didik dengan menanyakan kembali pembahasan yang telah didiskusikan dengan menunjuk salah satu siswa.</p> <p>27. Guru memberikan tugas rumah atau latihan kepada siswa</p> <p>28. Kesimpulan dari pertemuan atau pembelajaran.</p> <p>29. Doa sebelum pulang.</p> <p>30. Salam.</p>	<p>15 Menit</p>
---	-----------------

❖ Pertemuan kelima

Rincian Waktu	Waktu
Pendahuluan/Kegiatan Awal <ol style="list-style-type: none"> Memulai pembelajaran dengan salam dan berdoa bersama, mengecek kehadiran, dan menyiapkan peserta didik untuk mengikuti proses pembelajaran di kelas. Guru menyampaikan tujuan pembelajaran yang harus dicapai siswa sesuai dengan materi yang akan dibahas. 	15 Menit
Kegiatan Inti <ol style="list-style-type: none"> Guru mereview materi pada pertemuan sebelumnya Guru memberikan 1 topik untuk setiap kelompok Siswa mendiskusikan topic tersebut dengan teman kelompoknya Siswa mengumpulkan informasi-informasi mengenai topic yang telah diberikan oleh guru. Siswa menyusun informasi mengenai topic yang telah diberikan oleh guru kedalam bentuk deskriptif essay. Siswa mengajukan hasil kerja kepada guru Setiap kelompok mempresentasikan hasil kerja mereka didepan kelas. 	60 Menit

<p>Kegiatan Akhir</p> <p>10. Guru menanyakan pemahaman peserta didik mengenai pembelajaran sebelumnya.</p> <p>11. Guru kembali mengevaluasi peserta didik dengan menanyakan kembali pembahasan yang telah didiskusikan dengan menunjuk salah satu siswa.</p> <p>12. Guru memberikan tugas rumah atau latihan kepada siswa</p> <p>13. Kesimpulan dari pertemuan atau pembelajaran.</p> <p>14. Doa sebelum pulang.</p> <p>15. Salam.</p>	15 Menit

APPENDIX 4

LEARNING MATERIAL

1. Definition of descriptive text

Descriptive is derived from the word describe. Describe means to draw, to illustrate or to picture object, place, person in order to have visual appearance of the object described and Descriptive text is a text which says what a person or thing is like. Social function is describe, tell, identification and etc.

2. Structure text

TSUNAMI

Tsunami is natural disaster caused by the increasing waves of the sea to land with a high swiftness as the consequence of the quake which is centered under the ocean. The quake can be caused by land erosion, sifted plate, an erupted volcano as well as a meteoroid that falls in the ocean. Tsunami usually happens if the size of the earthquake exceed until 7 on the Richter scale. This tsunami is quite dangerous, mainly for those who live around the beach. With great force, it will sweep out whatever around it. From all causes of tsunami, earthquake is the major cause.

An earthquake on the bottom of sea gives rise to an affliction of the sea water that caused by the change of the profile of the ocean floor that generally occurs because of tectonic earthquake and perpendicular (vertical) ground motion with the surface of the se water or earth surface.

If the movements of the ground are horizontal on the surface of the sea, there will not happen tsunami.

Even though the movement of the ground horizontal, but the energy of the earthquake is big, and it can cause the collapse of cliffs/hill on the sea automatically in which the movement is perpendicular to the surface of the sea. Although there is no earthquake that hits the land directly which result vertical movement, the condition of cliff and hill in the sea has been unstable and because of the force of gravity and ocean currents that led to landslides, it causes tsunami.

The victim of tsunami is not a little. The casualties are hit by sluggish water low and material that carried away by the tsunami. Besides the victim, tsunami also has a negative impact on the building, herbs, and pollution to agricultural land and water.

Generic structure	Sentence
Identification	Tsunami is Natural disaster
Description	Tsunami usually happens if the size of the earthquake exceed until 7 on the Richter scale. This tsunami is quite dangerous , mainly for those who live around the beach. With great force, it will sweep out whatever around it.

3. The element of language

- (11) Penyebutan kata benda singular dengan *a* dan *the*, dan plural (-s)
- (12) Kata ganti *it, they, she, we*, and etc.; *our, my, your, their*, and ect.
- (13) Kata sifat yang sangat lazim *old, fat, tall, short, beautiful, patient, nice, wise, smart*, and etc.
- (14) Kata kerja untuk menyatakan keadaan dan tindakan rutin dalam simple present tense: *be, have, has, like, love*, and ect.
- (15) Penggunaan nominal singular plural secara tepat atau tanpa *a, the, this, those, my their*, secara tepat dalam frasa nominal.

TSUNAMI

FLOOD

APPENDIX 5

a. Pre-test result

$$t = \frac{\bar{x}_1 - \bar{x}_2}{\sqrt{\left(\frac{SS_1 + SS_2}{n_1 + n_2 - 1}\right) \left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

$$\begin{aligned} \rightarrow SS_1 &= \Sigma X_1^2 - \frac{(\Sigma X_1)^2}{n_1} \rightarrow 4.151 - \frac{(11,89)^2}{29} \\ &\rightarrow 4.151 - \frac{141,37}{29} \\ &\rightarrow 4.151 - 4,87 = 4.146,13 \end{aligned}$$

$$\begin{aligned} \rightarrow SS_2 &= \Sigma X_2^2 - \frac{(\Sigma X_2)^2}{n_2} \rightarrow 3815 - \frac{(11,41)^2}{29} \\ &\rightarrow 3.815 - \frac{130,18}{29} \\ &\rightarrow 3.815 - 4,48 = 3.810,52 \end{aligned}$$

$$\rightarrow t\text{-test} = \frac{59,31 - 56,89}{\sqrt{4.146,13 + 3.810,52} \cdot \sqrt{1 + 1}} \\ \frac{29 + 29 - 1}{29 \cdot 29}$$

$$t = \frac{2,42}{\sqrt{7956,65} \cdot \sqrt{0,03 + 0,03}} \\ \frac{56}{56}$$

$$t = \frac{2,42}{\sqrt{142,08} \cdot \sqrt{0,06}}$$

$$t = \frac{2,42}{\sqrt{8,52}} \\ t = \frac{2,42}{2,91} \rightarrow t = 0,83$$

b. Post-test result

$$t = \frac{\bar{x}_1 - \bar{x}_2}{\sqrt{\left(\frac{SS_1 + SS_2}{n_1 + n_2 - 1}\right) \left(\frac{1}{n_1} + \frac{1}{n_2}\right)}}$$

$$\begin{aligned} \rightarrow SS_1 &= \Sigma X_1^2 - (\Sigma X_1)^2 \rightarrow 7.255,12 - (15,80)^2 \\ &\quad n_1 \qquad \qquad \qquad 29 \\ &\rightarrow 7.255,12 - \frac{(249,64)}{29} \\ &\rightarrow 7.255,12 - 8,60 = 7.246,52 \end{aligned}$$

$$\begin{aligned} \rightarrow SS_2 &= \Sigma X_2^2 - (\Sigma X_2)^2 \rightarrow 6.853,90 - (15,36)^2 \\ &\quad n_2 \qquad \qquad \qquad 29 \\ &\rightarrow 6.853,90 - \frac{(235,92)}{29} \\ &\rightarrow 6.853,90 - 8,13 = 6.845,77 \end{aligned}$$

$$\rightarrow t\text{-test} = \frac{79,03 - 76,86}{\sqrt{7.246,52 + 6.845,77} \left(\frac{1}{29} + \frac{1}{29} \right)}$$

$$t = \frac{2,17}{\sqrt{14092,29} \left(0,03 + 0,03 \right)}$$

56

$$t = \frac{2,17}{\sqrt{251,64} \left(0,06 \right)}$$

$$t = \frac{2,17}{\sqrt{15,09}}$$

$$t = \frac{2,17}{3,88} \rightarrow t = 0,55$$

Based on the data analyze, the result of t-test is normal. The samples are in normal distribution if value significance correlation is

higher than 0,05. In the post-test experimental class 0,55, it is higher than 0,55. While, the post-test control class is 0,83 it is higher than 0,05. It can be concluded that the sample in post-test control class are normal. From the result of conclusion above, it can be seen that the all data are normal.
