

## ABSTRAK

**MARINI SUMARNI**, Tahun 2015 *Dampak Industri Nikel Terhadap Peningkatan Kondisi Sosial Ekonomi Masyarakat di Desa Papanloe, Kecamatan Pa'jukukang, Kabupaten Bantaeng*, Skripsi Program Studi Ekonomi Pembangunan Fakultas Ekonomi dan Bisnis Universitas Muhammadiyah Makassar. Dibimbing oleh Pembimbing I Ibu Asriati dan Pembimbing II Ibu Warda. Penelitian ini bertujuan untuk mengetahui Dampak Industri Nikel Terhadap Peningkatan Kondisi Sosial Ekonomi Masyarakat, di Desa Papanloe, Kecamatan Pa'jukukang, Kabupaten Bantaeng. Jenis Penelitian yang digunakan Peneliti adalah deduktif kualitatif. Metode yang digunakan dalam penelitian ini adalah, observasi, wawancara, dan Dokumentasi, peneliti mewawancarai 7 orang, yang merupakan, kepala desa papanloe, masyarakat desa papanloe, dan masyarakat yang bekerja di Industri Nikel. Berdasarkan analisa dari penelitian tersebut terdapat hasil bahwa dampak Industri Nikel yaitu bagi masyarakat Papanloe dampak negatif lebih banyak daripada dampak positif yang ditimbulkan adanya Industri Nikel. Mengenai peningkatan kondisi sosial ekonomi masyarakat, bagi masyarakat Papanloe tidak semua masyarakat merasakan kesejahteraan dengan adanya Industri Nikel, hanya masyarakat yang bekerja di Industri Nikel yang merasakan dampak positifnya karena tidak adanya izin yang diberikan pihak perusahaan kepada masyarakat untuk membuka usaha disekitar lokasi Kawasan Industri Bantaeng.

**Kata Kunci** :Dampak Industri, Peningkatan Kondisi Sosial Ekonomi

## **ABSTRACT**

**MARINI SUMARNI**, 2015 The Impact of the Nickel Industry on the Improvement of the Socio-Economic Conditions of Communities in Papanloe Village, Pa'jukukang District, Bantaeng Regency, Thesis of Development Study Program of the Faculty of Economics and Business, University of Muhammadiyah Makassar. Supervised by Advisor I Mrs. Asriati and Advisor II Mrs. Warda. This study aims to determine the Impact of the Nickel Industry on the Improvement of Community's Social Economic Conditions, in Papanloe Village, Pa'jukukang District, Bantaeng Regency. The type of research used by researchers is qualitative deductive. The method used in this study was, observation, interview, and documentation, the researcher interviewed 7 people, who were the village head of Papanloe, Papanloe village community, and the community working in the Nickel Industry. Based on the analysis of the research there is a result that the impact of the Nickel Industry is for the Papanloe community the negative impacts outweigh the positive impacts caused by the Nickel Industry. Regarding the improvement of the socio-economic conditions of the community, for the Papanloe community not all people feel prosperity with the Nickel Industry, only people who work in the Nickel Industry feel the positive impact because there is no permit given by the company to the community to open a business around the Bantaeng Industrial Estate location.

**Keywords:** Industrial Impact, Improved Socio-Economic Conditions
